

## **WORLD IS FORTUNATE THAT ZULF ABSORBED THE EXTREME AGGRESSION OF BILL GATES RATHER THAN A JEWISH MAN**

Bill Gates' white supremacy implies anti-semitism implicitly, and he has revealed his belief that Nazis who slaughtered European Jews are superior to them. Naturally Jewish leaders such as Madam Christine Lagarde are quite concerned.

Now I probably saved the lives of billions of people by absorbing huge amounts of beastly vile destructive aggression from Bill Gates, and I have many advantages over Jewish people in this particular saviour of the world sort of role.

You see, there is a developed body of standard anti-semitic language, tropes, whole system that is regurgitated by many Christians in America and Europe whenever a Jewish person is involved in one of these sorts of conflicts against Nazi racial types. In this case, none of that is effective because I am of Bengali-Persian descent. Moreover, although I am of Muslim background I became Atheist in 1979 at six, so I am fairly immune to anti-Muslim propaganda which is fairly new. In fact it was developed since late 1970s before which in the West Muslims were simply not part of popular consciousness. Now this anti-Muslim propaganda is fairly ineffective against Zulf as well because I am simply not familiar enough with Islam to actually understand it. I have my own faith and it is not Islam or Christianity.

So here I am fairly immune to all standard crossfire in political lingo like a living Neo from Matrix doing this thing over here.

WORLD IS FORTUNATE THAT ZULF ABSORBED THE EXTREME AGGRESSION OF BILL GATES RATHER THAN A JEWISH

So be my guest fire off some invectives, some hate speech, some stock epithets at me, and you will find that I am quite unaffected. I would tsk tsk and say, "You shouldn't say such mean things about the poor such and such people."

Now you might not think this is such a big deal. Well that's because you are not Jewish facing severe anti-semitic hate speech and you're not Muslim facing severe anti-Muslim hate speech etc. See, I am the sort of person who, when faced with a blonde woman on facebook posting a gorilla claiming I look like it responds with "Maybe, but similarity to yourself is uncanny." I don't give a damn.
