

ON ISSUES OF RACE AMERICAN WHITE PEOPLE IN INDUSTRY ARE INFINITELY SMARTER THAN IN GOVERNMENT

ZULFIKAR MOINUDDIN AHMED

Not all American White People are the same. American White People in Industry are infinitely smarter than American White People in Government on issues of Race.

American White People in Government finally did a consider and found that Bill Gates had buried me in an Ancient Greek grave with high power. Finally, after a year when they were all dumber than Stimpy.

You see, American White People in Industry are not less *violent* than American White People in Government. They are as violent. But the difference is that they will kill other White People as easily as non-white people.

Just take a look at what a Senior American Executive will do when they find that another guy in the company is a white supremacist or neo-Nazi. They will quickly take out a shotgun and blow his head off quickly. Do you know why? In their minds is "Um, so I have 2,000 people and holy fuck I'll have Black Lives Matter right in the company and oh my God the sales in Asia and South America. No no I'll blow this fuck's head off and say it was an accident."

The American White People in Government are not as quick witted on these they are routinely committing mass murder of non-white. I will tell all of them well my name is Zulfikar Moinuddin Ahmed but I am actually not Muslim at all. I became an Atheist in 1976, and then I moved to America in 1987 and was more Westernized etc. Then ten years later they will say, "Well this guy is Muslim. He could be connected with Hamas, Hezbollah, Al-Qaeda in Levant and a numerous other terror groups. We'll put a tab on him." In other words, Stimpy is a super genius compared to the American White People in Government.

Why is this? No one understands. You see being white does not always grace you with the gift of intelligence always. Some are quite gifted in that way. Alas, American White People in Government don't have the right sort of divine gifts, shall we say?

1. YES THIS WILL GIVE AMERICAN WHITE PEOPLE IN GOVERNMENT DUMBER THAN STIMPY REPUTATION

You see American White People in Government, you don't actually know Muslim people. In America Muslims are a minority of 1.1%. You are remarkably ignorant about Muslims. But you are *glib* and so you talk *as though you have figured Muslims out*. But you see, the world has 1.5 billion Muslims. And Islam and West have been interacting in various ways since the origin of Islam around 610 AD. You think you know Muslims and Islam? You see Europeans know Muslims much better than

Date: December 12, 2021.

you do. Spain was strongly under Islamic influence since the Umayyad Conquest of Hispania around 710 till the expulsion of the Mariscos, around half a million in 1609 ordered by King Philip III of Spain. But Islam is vast in reach. Islam reached Bengal between 11th-14th centuries. My ancestral line goes back three thousand years in Vedic India, and they were Muslim converts along the way.

Around the world, there are huge complex relationships between non-Muslims and Muslims that go back to 610 AD. Muslims are much better known to the world than *you* are. So you look dumber than Stimpy to most people in the world when you say "Ah, a Muslim name implies that we ought to seek some connection with terror or fundamentalist groups. Islam is a religion like Christianity. Maybe it seems intelligent to *you* to immediately make this connection but it is actually dumber than Stimpy objectively. I will leave it as homework for you to deduce that Stimpy is a genius compared to this "Let's associate Muslim name with various radical fundamentalist Islamist groups." The probability that a non-Muslim person on Earth knows some Muslim people well is much higher than they know you and your family and culture, okay?

2. FINE I WILL HELP YOU OUT A BIT WHITE PEOPLE IN AMERICAN GOVERNMENT

I will help overcome your amazingly ignorant stupid views of Islam. It's so atrocious than most Muslims will literally think you are far less intelligent than this cat here, the one on the right. He's famous for "Stimpy! You idiot!"

In order to avoid this fate listen carefully to what I say. I will recommend books by two historians of renown. I will vouch for them. They are very good. One is Andre Wink and the other is Richard Eaton [1, 2]. Andre Wink has a three volume book called *Al-Hind: Making of the Indo-Islamic World*. Andre Wink is Dutch and is emiretus at Wisconsin-Madison, and Richard Eaton is American now at Arizona. He has some very nice work from where I actually came to understand my family history of Bengal; he writes about how Islam spread to Bengal in 11th-14th centuries. Read their works.
