

THE GENESIS OF UNITED NATIONS HUMAN VIRTUE PROGRAM IDEA

ZULFIKAR MOINUDDIN AHMED

The first occurrence of the idea for *United Nations Human Virtue Program* came to me on November 30 2021. I was still stuck in Allen Texas. I had been asking England for a while for relief from illegal obstructions to my legitimate earnings of \$620 million for some time then. I was having an interesting conversation with Julia, a lovely lady from Kiev, Ukraine. My resources were low. Not long before I had succeeded in identifying four virtues of Romantic Love. In the past two days my attention turned to the issue of Intimate Partner Violence (IPV). I had looked at rapes and murders around the globe in the past several years and I was surprised to find that IPV has an average of 10% with dispersion 5.6%. That is roughly three orders of magnitude higher than rape rates of 0.03%. And after a brief inspection of the literature I quickly realised that this is a matter of Moral Virtues. My intuition was strong enough that I immediately estimated that in two decades and \$4 trillion IPV could be reduced to 0.1% range.

Then I returned to the K-12 proposals I had made and realised that this requires a separate United Nations organisation. This is when I made my proposal for *United Nations Human Virtue Program*.

I was pleased to learn that having found out about Bill Gates racial war plans against Asia, that United Nations Security Council was firmly against it. That's good. Yes, the money ought to be used for *United Nations Human Virtue Program* instead of wars. In fact, just wipe out the son of a bitch Bill Gates and confiscate all his wealth and put it in *UN Human Virtue Program*. No one will weep for his departure from the world.

Of course, my personal preference is that the Headquarters of UN Human Virtue Program be located in San Francisco, where the founding of the United Nations took place, and also because I want a temporary job as Special Managing Director to get out of Allen Texas where I am stuck in a rut. This is really the right idea, and the great father of Positive Psychology, Martin Seligman, also a Princetonian, ought to be invited in an advisory position.
