

ZULF CONSIDERS THE MENTAL HEALTH CIRCUIT MANDATE BY FBI AS POLITICAL REPRESSION

ZULFIKAR MOINUDDIN AHMED

Tomorrow in the morning mental health workers will be dragging me into what amounts to denial of Liberty for me for frivolous and dubious criminal suspicions. I have experienced this before and I know it is denial of natural right of Liberty that is Constitutionally mandated with some incredible charges. I will plan to litigate against the Federal Government for this as national law enforcement organisation was involved for \$1-1.5 trillion afterward.

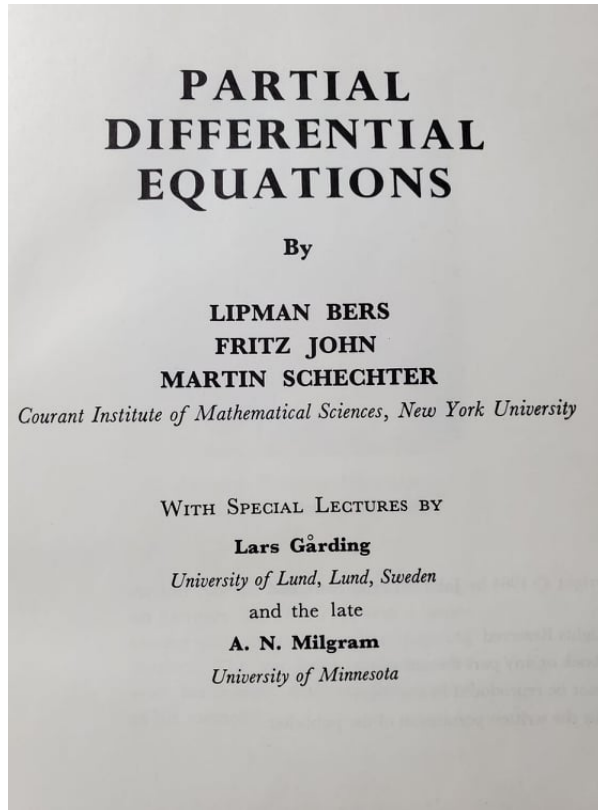

But Bill Gates had been considering nonstop in my meta, and my physical health has been accosted by power maneuvers of his. I will obviously deny any wrongdoing, as the mandate to send me to mental health circuit was based on a poster which was clearly *unrealistic* and *humorous*. I believe that this is *Political Repression* of the worst kind akin to Gestapo visits to Jewish people during Kristallnacht.

United States Government has a long history of political repression, and I am familiar with some of the history from Robert Justin Goldstein's *The History of Political Repression in America*. Furthermore, United States of America has a record of genocidal treatment of non-white people from the nineteenth century with Indian Removal Act of Andrew Jackson in 1830 and before. The brutal and savage dehumanisation of non-white people is only mildly changed, as not the actual racial murderous criminals with protection of \$131 billion, i.e. Bill Gates, was bothered while he continues to do all that he can to harm and kill me by illicit use of power, but that my humorous poster was weaponised as though I had in the poster mentioned any intention to use sniper rifle to assassinate him, which is not credible.

I am displeased with mistreatment of the United States Government and consider this to be egregious political repression. I want this to be understood as record.

1. NEW BOOKS ARRIVED TODAY

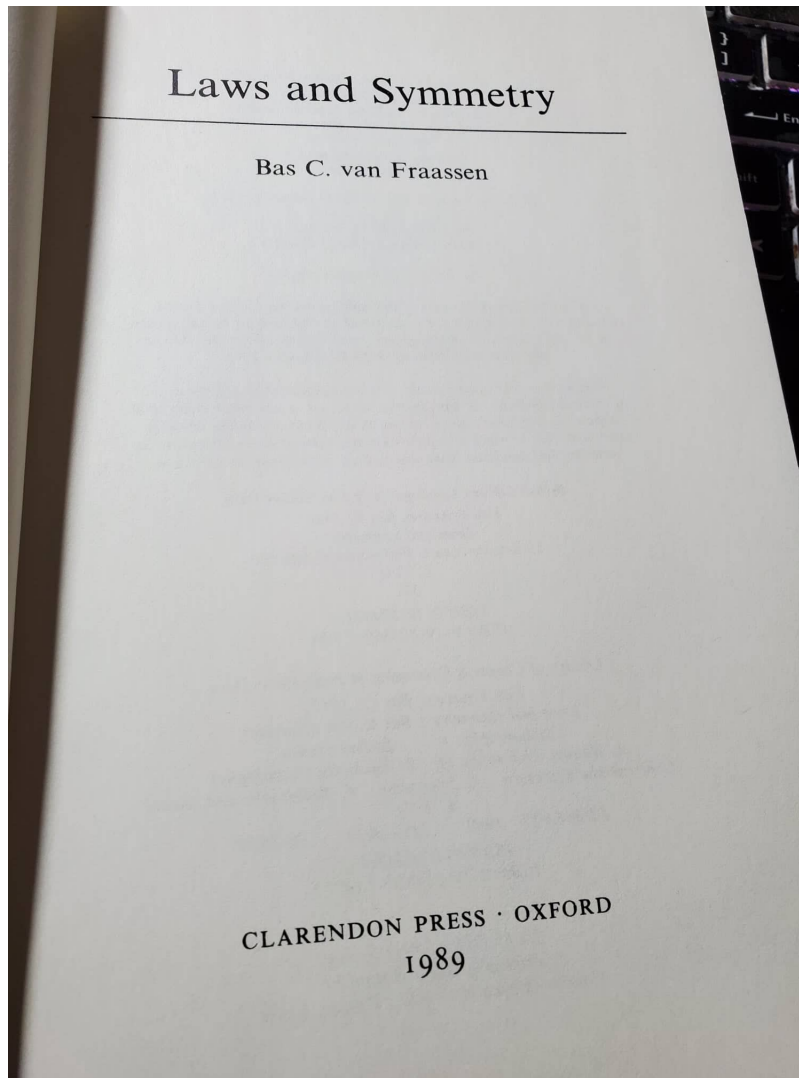

I want to record the books that arrived today that I had been planning to examine. One of them is a textbook that Jeff McNeal, my advisor at Princeton had studied from himself, Bers-Shechter-John *Partial Differential Equations*.

With roughly four Stanford Analysis Exams already completed, I feel ready for going through various issues in mathematical analysis of PDE where I have gaps in my mastery and that is the purpose of this book.

1.1. Philosophy of Science Evolution. As you might know, I have a different fundamental dynamical law for all physics above $\delta = 10^{-15}$ cm, the *Ahmed-d'Alembert Law* that displaces all other dynamical laws including Maxwell's Equations, Schroedinger's Equation, Dirac's Equations, and Einstein's Equations. The new name is justified because there are substantial differences in *physical behaviour* based on the S4 Electromagnetic Law compared to various previous and less perfect laws of Nature. My Four-Sphere Theory had been successful in matching theory with measurements and required effort of more than a decade 2008-2018. It will be the final laws of physics that will not be challenged for the next several million years for it will be quite impossible as it is exact match to Nature.

Other books, are Bas C. Van Fraassen's *Laws and Symmetry*. I took a course on philosophical problems of quantum mechanics with professor Van Fraassen, and at the time I was absorbing issues. The issues led to firmer faith in four-sphere theory as a challenge to quantum mechanics in the years 2008-2018 when I took on the problems.

Then there is a study of Newton and Maxwell's Scientific Strategies by Peter Achinstein.

Two books on history and philosophy of science. Thomas L. Hankins, *Science and Enlightenment* and a book of expert essays *From Natural Philosophy To The Sciences*.

These represent a renewed effort for me to gain some insight to resolve the question of the *status of Mathematics* as Four-Sphere Theory provides some deeper reflection necessary as we are quite a bit far from the confidence only based on empirical observations and experiments. We have had several centuries of experience in physics where the empiricist philosophy is insufficiently powerful in gaining deeper insight about laws of Nature, and Four-Sphere Theory is a mathematical physics fundamental theory that also pays much more attention to the mathematical structures that have been derived from nature. Roughly, once you have done the same

experiment 20,000 times, you are foolish for keeping repeating that experiments taught you something.

2. THE PSYCHIATRICALY TRAINED DOCTORS WILL HARM ME

I am 100% sure that the psychiatrically trained doctors are going to harm me and not help me. The mental health circuit I have dealt with already for many years. Bill Gates has used US Industrial, US War, and White Racial Powers and hard meta to accost me. These are not even known to exist by the mental health professionals. While I do not have any means of harming Bill Gates, the fantastic *threat* that was used as a basis for coercing me into harmful mental health circuit and denial of my natural right of Liberty that will begin tomorrow, the harm that Bill Gates continues to do is not accepted and is not explainable without my Four-Sphere Theory being established. While (a) I do not now and never have ever had possession of any fire-arms, and while (b) the sort of threat that might exist even if I did possess fire-arms would only be real if I were in 100 meter radius of Bill Gates who lives 2100 miles away from 915 Meadowgate Drive, Allen TX 75002, the *racial murderer Bill Gates* has invaded my personal meta defying laws of nation and international laws and destructively violated my body and Ancestral heritage. He violated Geneva Convention mandate here as it is a violation of international war crimes law to even do these things to prisoners of war. I experience these things and do not appreciate having to face accusations of hallucination when I have degeneration of physical health due to Bill Gates exercise of esoteric power against me obsessively. He caused enough harm to me to have killed any Bengali man by November 4 2020.

3. WHAT SORT OF FELONY IS HUMOUR

It is *humour* when a man whispers to himself without any mention of any fire-arms with a bull's eye on the head of a tycoon with \$131 billion *who is a public figure* who has huge amounts of security forces and lives 2100 miles away. It might not be humour that you appreciate, but it is absurd to consider this a threat to his life. *Pulling the trigger* is not unambiguous here and so I will fight any attempt to consider this a physical threat. I can easily consider a *political threat* because Bill Gates is not in the same political camp as myself. I believe in single human race and universal natural rights. He believes in racial supremacy of whites and has obstructed my legitimate earnings of \$620 million. I will accuse the government of having racial supremacy agenda working on behalf of Bill Gates as well. He was not in any physical threat from me at all. It is absurd beyond any reason to consider my poster a physical threat to Bill Gates. It was not. I will bring this up in international courts immediately. This is flagrant violation of my First Amendment rights.

4. IT IS RATIONAL TO SUSPECT CONSPIRACY OF BILL GATES AND UNITED STATES GOVERNMENT TO DESTROY MY LIFE

A London Human Rights Watch consider found that United States Government joined Bill Gates in an effort to destroy me. I am not paranoid about this. I am quite aware that Bill Gates has allies who believe that his White Supremacist World Order is feasible, support him, and so I know that my own government, the United States Government have conspired to destroy me.

Now the local FBI officers and police are not high up enough to know this, but I know this, and I believe that mental health incarceration is not innocent but will destroy my life and future because I have a lot of work to do right now that is essential for my survival that will be damaged. I had plans to do around 10 Stanford Mathematics Ph.D. problem sets each of which take enormous effort and concentration that will be totally in disarray. My mother is in her death-bed not healthy enough and I know that she might commit suicide from distress if I am taken away and incarcerated even for mental health reasons. I do not consider this a minor issue, and I intend to hold the United States Federal Government responsible with \$1-1.5 trillion lawsuit for these destructive acts against myself.
