

HIGHEST STUDY IS THE NATURE OF THE GODS

ZULFIKAR MOINUDDIN AHMED

As I am quite sure that the damage that Bill Gates has done to me, which ought to have killed me on November 4 2020, according to Royal Menders of Queen Elizabeth, did not, I am quite sure that the chance of my death in mental health custody is more than 50% as my comfort zone is disrupted and Bill Gates is likely to be more aggressive and might take control of the clinic and someone or another might just poison me to death and claim it was Covid. I want the world to know that the murderer was indeed Bill Gates.

But more important the study of Mathematics and Science and Poetry, clearly is the study of the Nature of the Gods. The nature of the monotheistic God is unknown to me, for it is the force that moves all things and is eternally silent and inscrutable. But the nature of the gods, the ones with small 'g', this is the highest subject of study. It is more important than study of Mathematics, of Science and Poetry, it is higher. Both Ancient Greeks and my Vedic ancestors agreed on this, and as I approach a high probability of death, I must ensure that all my beloved people understand that the study of the nature of the gods is precisely a study of one's own inner Virtues. And this is more important than study of Mathematics, of Physics and Poetry.

Do not be confused by the people like Charles Baudelaire and do not be pessimistic like Robert Musil. I, Zulfikar Moinuddin Ahmed, will assure you that there are millions of worlds, Angelic Worlds, just like yours, like Earth and Human Race, and you are not alone. You will be remembered among the Archangels of Heaven, my beloved people. We will keep an eye on you.

Thank you,

Zulfikar Moinuddin Ahmed
