

## DOES ZULF HAVE MISFORTUNES AND DO THEY DESERVE EXPLANATIONS?

Chris Thorpe fired me from Babel Research sometime early July of 2008. I could consider the betrayal for we had planned the company together some years earlier in San Francisco. He was certainly disloyal in some way or another but then again he was not a close friend of mine but a Harvard roommate of my brother, who later told me he would not have recommended I work with him at all. Anyway I wanted to do my own show and just did not have enough money but I had ideas about Four-Sphere Theory and Protein Folding and others. Well I did not have enough support and my money started running out and I had decided that I had made a great breakthrough where I could construct a Great Republic of Humanity to secure Natural Rights of all people of Earth. This led to my arguments against Legitimacy of all Nation States and eviction from my Williamsburg loft and I refused to retract my arguments. That went nowhere and for six months I was hobo. Then finally I went by Greyhound to Cincinnati and worked on my ideas in Physics and other things. Then years at Allen Texas burdening my aunt who is a bitch from hell in abusiveness. A decade passed here and I am on disability income. I worked on Medium Frequency Alpha and that is traded by D. E. Shaw & Co. with \$6 bn and Bill Gates is making money on it but Bill Gates cut up my eyes and started harming me blocking my \$120 million. I had switched gears to Personality Psychology after success with Four-Sphere Theory [1] and no one congratulated me; I had to take my own credit. Then I began my campaign for United States to wipe out Bill Gates or at least bring him to justice. They were not enthusiastic and I contacted UN Secretary-General Antonio Guterres regarding possibility of secret cult of white supremacists corrupting the purity of our Republic.

I had also begun to promote Global Life Satisfaction Project to some funders. I thought MIT Sloan would come through and they did not. Then I targeted Todd Gibbons and Hanneke Smits because \$0.5 billion allocation is not much for the \$2 trillion book of Bank of New York Mellon.

### 1. MISFORTUNES?

Well the last two decades was such a flurry even though I was far from Civilisation in Allen Texas stuck with disability I was continuously on Facebook or emailing large numbers of people, being accosted for destruction by Bill Gates, claiming immortal genius for Four-Sphere Theory and so on. I am a Princeton Man, and I have great ambitions and ideas, so relatively there are misfortunes, but in my case the misfortunes were deliberate activity of Bill Gates or incompetence of United States Government. They were not exactly landslides from Nature; they were man-made misfortunes. These are easier to handle psychologically. I can point to Evil Malevolent Inferior Low Life Insignificant Amoeba Bill Gates and yell at him say "You'll never get away Knave, for I shall Slay Thee". I can yell at the US Government Higher Officials at my heart's content and tell them "You incompetent

lazy corrupt morons, fix this problem or you will all face execution and misery untold.” It’s not exactly normal misfortune, so it’s not ordinary optimism that I need. Now you could say ”Well, we don’t know. Maybe you are delusional and Bill Gates and US Govt are not really involved.” Well I know that I am right so I dismiss those ideas from my brother and aunt and others. I know what my life is like; and they, even nearby physically do not have to partake.
