

ZULF EXAMINES THE MEANING AND PURPOSE OF MY LIFE

ZULFIKAR MOINUDDIN AHMED

I am 48 and I have recently been diagnosed with diabetes. I am living with my aunt in Allen Texas now on income from disability. I am a Princeton graduate with enormous amount of professional experience in Finance, Biotech, and Science. Since 2008, after Chris Thorpe fired me from Babel Research, I had been working on projects that are closer to my heart than the ones that would be lucrative per se. I sought to abolish all Nations after having consolidated my thoughts about Classical Liberal Principles. This did not lead to success. Of course the reasoning was rock solid. All men are created equal with Natural Rights endowed by Nature ('the Creator' in the parlance of Thomas Jefferson in US Declaration). Governments are formed in order to secure them. Well the right answer is that no matter where on Earth you are born, you are endowed with Natural Rights by Nature, and all legitimate power are those that secure the Natural Rights of *all human beings* and therefore Nation States are not legitimate. Founders of America did not examine the legitimacy of a National Government that finds it convenient to deny Natural Rights of those outside their privilege of citizenship. This is a great flaw that was not mended. What United States did instead was a compromise of sorts. We won the Second World War and rough geopolitical hegemony and then we created United Nations and the UN Declaration of Universal Human Rights was passed as an international agreement. This is good but it is not solid. What is right is of course to seek security of Natural Rights as the fundamental principle of politics of the entire planet Earth and leave governance of locals, i.e. nations to an orthogonal set of restricted rights. But I did not succeed for a while in getting interest and got into trouble with FBI and backed off. Now my convictions here are powerful since I lost all my possessions and home in 2008 in the process so I have actual personal sacrifices tied to them. More than a decade later, when I registered a company with ideas of self-understanding for 8 billion, Bill Gates intervened and cut up my eyes, lied about me, used US War power to harm my body meta – which goes against Geneva Conventions and harmed my interior and did many other evil malevolent things to which the US Government response was to try to protect the evil malevolent murderer rather than secure my Natural Rights as is their purpose. I am now seeking funding from MIT Sloan and other large investors for creating a success for Life Satisfaction increase for 8 billion people on Earth. I have yet to see a single cent from MIT Sloan or anyone in my bank account.

I did succeed in overthrowing three centuries of Western Science with Four-Sphere Theory cleanly; and it is absolute truth regarding Nature. Yesterday Harvard Physics considered it standard in meta, and this is true, but Four-Sphere Theory was conceived and worked out by myself in Allen Texas without any support from any government or university at all. If it is standard, I want to see my

Date: July 2, 2021.

20 Nobel Prizes. It did not exist before I began working on it in Williamsburg Brooklyn in 2008. It is absolute truth, but why is my conception and work considered standard? I worked on it alone for a decade. It is most amusing. Where is my recognition for Standard Macroscopic theory that will be unshakable for a million years and that is 'standard' but did not exist before I conceived of it and singlehandedly worked it out without any income without my own place living with an abusive aunt in Allen Texas?

1. A GRAND UNITY OF NATURE AND IMPROVEMENT FOR LIFE SATISFACTION FOR MY BELOVED PEOPLE THE HUMAN RACE

I originate from Bengal, where I was born, from a highly Anglophile family, and I immigrated to the United States of America in 1987, some three decades ago, when I was a wee boy, and America is my home. I am Indian-American, Asian-American, Bengali-American, and so on. The dash does not matter so much, as I am American. I was strongly influenced by many great geniuses throughout my development as a man. When in high school and during college Fyodor Dostoevsky and Franz Kafka, but also Friedrich Nietzsche and Ralph Waldo Emerson. I was strongly influenced by the Enlightenment Universalist Natural Rights theory, and indeed my American-ness lies mostly in my acceptance of the Sacredness of Natural Rights of all human beings and the notion that there is no legitimate power that does not secure Natural Rights. This is an American understanding of the world, this idea that you do not have legitimate powers and authority with anyone at all until you take responsibility to secure their Natural Rights. This is something so deeply part of my convictions and soul that this is what makes me American. I am not impressed with people who claim that they are more American than me because their family ancestry is from Europe, or that they are English-ethnic and America was an English colony, etc. Those things are superficial. I do not believe that you can simply gain American-ness without an American Soul, and an American Soul is one that has vast respect for Natural Rights of all people and would like to see Natural Rights of all people on Earth be secured. That is robust American-ness. All these other sorts of claims to American-ness such as ethnic history, such as money, such as particular heavy metal bands, ra ra with American flags are flimsy by comparison. I have been quite concerned with understanding Nature's laws, and the relationship of Man and Nature for many years of my life. I do this by my own efforts and although I have asked for full professorship at Harvard, Princeton, Yale, Stanford, and Berkeley along with two Ph.D.s one for Four-Sphere Theory in Physics and one for my work on Universal Human Nature where I have profound and clear results proving universality of Human Nature across all ethnicities of the world.

My work shows with clear strong scientific path the unity of all things of Existence and their place; the laws of Nature, the laws of Man, and their relationship, the Nature of Human Beings. My answers are not just innovative but in some cases the first time there are actual correct answers to these great questions in several millenia.

Naturally, there is a natural meaning that is discovered in my life. I exist on Earth to provide the Light of Knowledge and Truth to my Beloved People the Human Race. I exist to improve the Human Condition and improve Life Satisfaction for Eight Billion of my people.

2. WHAT ARE MY DREAMS FOR THE WORLD?

Instead of having generic dreams for the world, hopes and prayers and wishes, I have some specific things I want to do for my Beloved People the Human Race. I don't have time to worry about too many other issues.

- Global Individual Credit Must Be Rationalised
- Global Life Satisfaction Must Increase
- Global Happiness Must Be Targeted by Global Central Banking

These are the three major themes that I have developed over the past decade. I have specific ideas for how to accomplish each of them. I focus on these things. I don't care too much about other sorts of things.
