

## LETTER TO UNITED NATIONS SECURITY COUNCIL

ZULFIKAR MOINUDDIN AHMED

Dear United Nations Security Council,

I am extremely displeased with your work on a number of issues. You did not do your homework, and as a result even thought there was no hijacking at all on September 11 2001, and Israel faked the Muslim hijackings by electronic means (such as fake phonecall to the mother from a passenger), and just took control of the planes using remote control and demolished the Twin Towers using explosives, you did not veto wars in Iraq and Afghanistan. You did not veto Vietnam War. You did not veto Korean war. You did not notice American Manifest Destiny Asian plans from all the way back to 1945 when it was developing right in front of your noses. This is sickening. Why do you even call yourselves the UN Security Council. Unless you veto every single war by United States in Asia until the end of time, I recommend you change your name to *Asian Genocide Program*. At least then people will know your actual purpose. If you want to be the extension of Native American Genocide to Asia, why not just be more honest?

Clean up your show, United Nations Security Council, because Zulf is in town, and Zulf does not buy into all manner of flim-flam.

---
