

# REASONED ARGUMENT TO UNITED STATES GOVERNMENT ON WHY THEY SHOULD ACTUALLY KILL HIM IMMEDIATELY

ZULFIKAR MOINUDDIN AHMED

Look, United States Government, let me try to be reasonable here. You are ostensibly the government of a multi-ethnic classical liberal democratic republic. Bill Gates is formally a citizen of the nation by birth. That's fine. Now I know quite intimately well that Bill Gates has two serious convictions that you need to take seriously. I know a lot more about him than I want to.

His first conviction is that he is *not subject to United States law at all*; another is that *he is pursuing his lifelong dream of ruling the world*. These sorts of convictions are fine for a harmless man without great wealth or stature in the American society; they could be considered tragic in a way. But in the case of a man who is given a great deal of respectability as an industry leader, these are a significant threat to the population and to the state as well.

Let us go through the elementary reasoning. The laws of a Republic cannot make exception for any citizen. Bill Gates has strong intent to defy all laws of the Republic and is an enemy thus of the state. Second, his lifelong dream, along with his \$131 billion in assets, is a significant threat not only to United States of America, which cannot tolerate an Emperor of the World but also the international order.

Why would United States not destroy and kill him as a threat? I simply do not understand the reasoning. It's like having a snake next to the baby crib and feeling compassion for it. How corrupt are you exactly, because I do not want a corrupt government putting 330 million Americans in harm's way while taking vast resources from them in taxes.

Kindly destroy and kill Bill Gates immediately.

## 1. MY NATURAL RIGHTS WORLD ORDER IS CANONICAL

Unlike Bill Gates Palpatine type world order, where he is cutting into everyone's deep interior and destroying the human race, my Natural Rights World Order is better because it is clean and stands on US Declaration of Independence Preamble, and it is ethnicity-independent, and it is supported by the popularity of human rights by 80 percent of the human race. It is *canonical* even though I have initiative and took credit for it without much intention of implementing it by my own great labours.

If you want to call me an opportunist, fine, but I am surprised no one else just produced this world order in 1960s. I don't give a damn. I am proposing the most elementary clear civilised world order possible today and I will take credit for the
