Russia,

I want you to pull out all troops and machinery without any conditions. Any harm to Ukrainians will cost you global clout that will be permanent. Don't try to hold on to any position. Just pull out without conditions.

I will handle this myself.

Asia, I want you to create a large Asia-wide organisation right away and get United Nations General Assembly vote then *ask permission* from Kyiv government to enter the country and establish independent large survey. I want interview of several million people in Ukraine from all parts of the country. I want all data made public and available to social scientists for condition and life, subjective attitudes, mistreatment by government etc. Then I want you to present your findings to the United Nations and publish them. Do not doctor a damn thing. Whatever is the answer, just take the answers.

Russia, I want you to support Asian efforts and keep your war powers for Bill Gates type of genocide plotters. Ukrainian government is not anywhere near this sort of cat.

I am not Washington, Russia. I am Zulf, and Zulf is not anti-Russian or anti-Ukrainian or anti-anything.

Asia, don't bullshit. Do real work. Not soundbites. I am originally Asian. Do good work here.

1. THIS IS WHAT I WANT ASIA

I want a 0.5-1 million professional all-Asia organisation devoted to natural rights surveys. I want top-notch people from all countries, not just Japan, China, Singapore etc. include Nepal, Malaysia, Jordan, Syria, everywhere eventually. I want you to give Russia assurance that you will take care of natural rights in Ukraine. Then I want immediate funding. I will not lead this organisation I have things to do. I want you to get some veteran United Nations people from Asia to lead and put it together.

I want this done right away. Assure Russia with your honour etc. that Ukrainians will have their natural rights assessed and secured.

2. RUSSIA

I want no conditions and demands on Ukraine or any concessions demanded at all. Just unconditionally pull back with assurance from Asia. Then don't do invasions at all. You will lose leadership ability for Eurasian Defense program. You

will have better play later. Stop all military operations immediately. Do not worry about losing face etc. Alright? Zulf is good with Russians. I am not your enemy. Do it right away.

May the Light be with you all,
