

ZULF'S THEORY OF DEMONS AND ANGELS

ZULFIKAR MOINUDDIN AHMED

Here I address matters of faith and not science. I will put together my theory of Demons and Angels here. Do not believe anything here unless you accept full responsibility for the consequences yourself. I will not accept any responsibility for anyone who believes the following and faces difficulties of any sort as a result.

1. THERE ARE TRILLIONS AND TRILLIONS OF ANGELS AND DEMONS IN THE UNIVERSE

Angels and Demons are actual electromagnetic beings. They exist in the trillions and trillions in the universe. They can be disincarnate and without bodies at all in the way that we are accustomed, the body of flesh and blood. They can be alive and conscious and active regardless.

2. ANGELS AND DEMONS ARE IRRELEVANT FOR HUMAN LIFE UNLESS INCARNATE AS HUMAN BEINGS WITH HUMAN BODIES

All the trillions and trillions of Angels and Demons in the universe are literally completely irrelevant to the lives of human beings. The only ones that have any effect on human affairs are *those Demons and Angels who have actually been born of human womb*, i.e. they are ordinary garden variety human beings with Angel or Demon Souls.

3. DIFFERENCE FROM ISLAM, CHRISTIANITY, JUDAISM

Much of the mythology of Angels and Demons are interesting from Christianity, Islam, and Judaism. I totally radically differ from these religions in that I do not believe any Demon or any Angel actually has any effect on human affairs unless they are born as human babies and have human growth in human world.

The major difference in my faith and the older religions is that I do agree that Demons and Angels have different characteristics but I do not believe that disincarnate Angels have any nontrivial effect whatsoever in human affairs. The only Demons and Angels that ever have any effect in human affairs are those who are born as human babies and have human lives.

My view is quite Atheistic in a way, for it strongly dismisses effects on human affairs of Angels and Demons who are disincarnate. At the same time, I am not material empiricist and do believe that human souls can be Angel or Demon. In the latter case, I do not consider the human being to be 'possessed' by the Angel or the Demon. I consider the human being to *be* an Angel or Demon. I don't think that possession etc. are significant. Being human in the ordinary way, one is acting as Angel or Demon.

Date: July 9, 2021.

4. BILL GATES IS A DEMON I AM AN ARCHANGEL

To make things concrete, I believe that I am an Archangel Soul living a human life; Bill Gates is a Demon Soul living a human life. There may be millions of other Angels and Demons living human lives. I don't track them. This is a matter of faith.

Most human beings are neither Angel nor Demon. Neither are they the only linear spectrum. But Angels and Demons are different fundamentally in various ways. Now Angels and Demons living human lives are not pure Angels or pure Demons. This is because human DNA determines many psychological traits and behaviours. We are just sourced Demons and Angels.

5. THE VALUE OF MY THEORY

The value is that it's true and Islam, Christianity, and Judaism are not right.
