

## ZULF ON BEING THE GREATEST GENIUS OF WESTERN CIVILISATION

ZULFIKAR MOINUDDIN AHMED

The German Chancellor had erred for a brief period assuming that I was Muslim, but after some time realised that I was not despite my name. While my mother was pregnant with me in 1973, my father's sister is said to have gone to Baghdad to visit with an Islamic holy man who picked her from a crowd to tell her that her brother's sister was with child, and so I was known to the holy men of Baghdad. My mother said proudly that I was born to give great gifts to humanity when I was young. Perhaps these had specific subconscious effects throughout my life. When in 2003 I was tugged by my Conscience to protest the war on Iraq, there might have been a sense of mystical pull rather than faithful adherence to Socialist creed. I am the Greatest Genius of Western Civilisation, for I have resolved the major problems of Universal Human Moral Nature, of Virtue-Eudaimonia for Life Satisfaction for all individuals, and Four-Sphere Theory for theoretical physics. I was not as greatness-seeking for a large part of my life. These great achievements of mine are fruits of 2008-2021, thirteen years without any ordinary income. I am extremely badly hurt at the moment, and with combination of diabetes, smoking, and more damage to me by evil magic of Bill Gates than anyone in history, death is a serious possibility. Germany is considering killing Bill Gates now. I was reading Robert Musil's *The Man Without Qualities* to find some insight and Section 9 is about Ulrich's being born to be a great man. I was ambitious in high school and later at Princeton but in a more mundane way than being a great man. The root of all true culture is the longing of man to be reborn as a genius and a saint, said Friedrich Nietzsche. I think that is from "Schopenhauer As Educator". He specifically adds that we are repelled and disgusted by talent that does not want to be reborn as genius and saint because then with all their great intellect they hinder the procreation of an evolving culture and procreation of genius. I like this positive part of Nietzsche. But my vision for the world is different. My vision for the world is that we have here an Angelic Race, and I evaluated the distribution of moral values in terms of the Rousseau Exponential and the Hobbes Exponential, with the first roughly 90-95% mass and the latter 5-10%; this resolves debates about human nature that raged without me in the West. I return to Virtues of two types, Moral Virtues and Romantic Love Virtues, and give the codebook for how this Angelic Race will achieve greater heights in the future. And I am reordering the World Order to make it a bit more useful, a Natural Rights World Order since now demand for human rights is 80%. I have identified a division of the United States Government into the legitimate Multi-Ethnic Classical Liberal Democratic Republic and an illegitimate deformations from 1950 NSC-68, a part of government that is unaccountable to Democratic politics that must be fully erased and refactored, the part where the \$768 billion vanished of "Defense Spending". It is certainly on an Asian Genocide

program following the Native American Genocide. It is the source of all wars disrupting Earth post-1945, and I forbade any wars in Asia at all already. IMF was attending to me, and I asked the Eurasian Powers, Germany, England, Russia, China, France, Japan to keep close to IMF. IMF is my tribe still as I am Finance. But I cannot rule out death very soon. My physical body feels miserable from outrageous war crimes and crimes against humanity caused to my deep interior by Bill Gates. I have been the Greatest Genius of the Western Civilisation.
