

ZULF WILL CRY FOR THE REST OF THE DAY

ZULFIKAR MOINUDDIN AHMED

I cannot believe this. This is a catastrophe, a tragedy. My alma mater Princeton University fell to rank 16 in the world. I will weep and moan and mourn this horror. I cannot stand this.

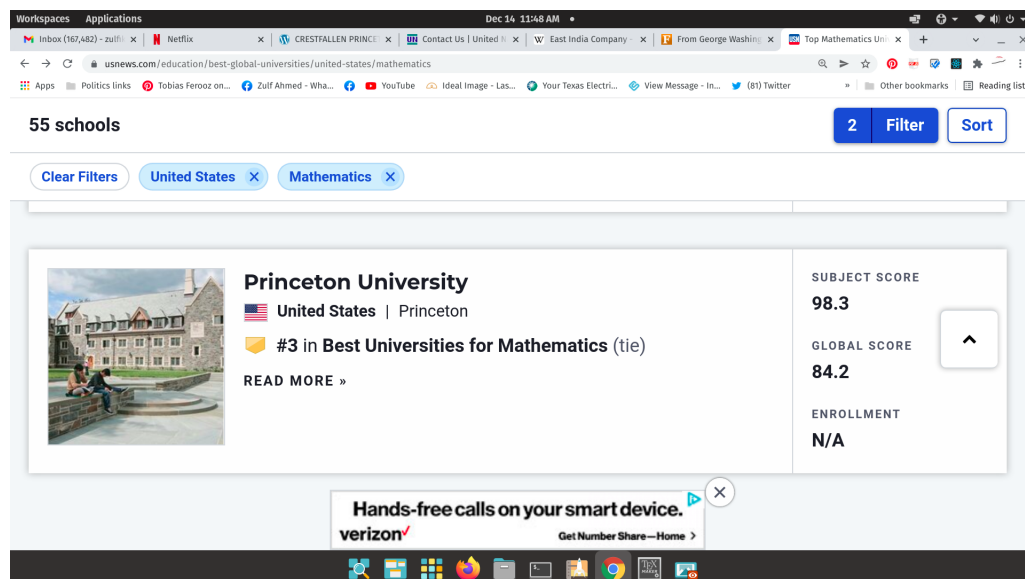

Ah, woe! My beautiful lovely Princeton. What have they done to you? How could this disaster have fallen upon you! This is intolerable. I cannot bear the sight of this 16 any more! I turn away in horror. This is too much for me to bear.

1. RANK 3 IN MATHEMATICS?

Oh my God! Disaster!

Date: December 14, 2021.

My beloved Princeton is now rank 3 in the world in Mathematics. What am I going to do now. I won the thesis prize for best original thesis of 1995 in Mathematics there. How will I face this shame!

2. I HAVE TO COPE SOMEHOW

My pride in myself is too tied to my beloved Princeton. I will have to do something, maybe meditate. It will be alright. I will overcome this devastating feeling of doom in my stomach. This sense of loss. This sense of feeling that the ground under my feet is no longer solid and strong.

3. WHERE IS BILL GATES' RECORD IN MATHEMATICS?

I have my thesis in Fine Hall Library. I graduated magna cum laude from Princeton. I will authorise United States Government to get all my grades at Princeton. Where is Bill Gates' record? Outstanding record? Where? Where are your publications? Where are your exam results? Where are your grades?

You are a total charlatan Bill Gates. Let's see real proof that you have any understanding of mathematics at all. Why don't you take an exam? I have Stanford Ph.D. qualification tests if you want that I did for self-test. Can you take some of these and without cheating get anywhere? Stanford Mathematics has public Ph.D. qualifying exams for Mathematics. Why don't you submit your answers. We shall see where you are Bill Gates. You are a liar and a charlatan without any mathematics talent at all.

We can compete. You can find the Stanford Past Qualifying Exams in Real Analysis and Algebra here [1]. Without cheating, give your answers, take your time and submit them. I will submit my answers too. If you beat me, I will stop totally trashing you as a glib charlatan without any mathematics talent. Otherwise I will maintain that that is what you are and it is your shtick that you have great mathematical understanding. Prove yourself in public, Bill Gates. You lied about your coding talent. You are a fake, an imposter, a liar.

You are no match for me in Mathematics, Bill Gates. You're a college dropout illiterate hick without taste.

4. WE'LL MAKE THE TEST EASIER FOR YOU BILL GATES

Let me tell you about some good textbooks. I Analysis, obtain Elias Stein and his student Shakarjis' four volume books. Also obtain the books by Barry Simon, the Comprehensive Caltech courses. Then get three of the Walter Rudin books. These should be enough.

The rules are copy from any of these textbooks all you like. But you can't ask anyone else for help.

I will guarantee that you don't know enough mathematics to know what to copy. It's not that easy, Bill Gates. You are a glib arrogant ignorant illiterate charlatan. You don't know mathematics, kiddo.
