

**WEST WILL FACE GREAT CRISIS OF FAITH FROM EAST
UNLESS HARVARD, YALE, STANFORD, BERKELEY AND
PRINCETON RESPOND WISELY TO ME**

ZULFIKAR MOINUDDIN AHMED

All of macroscopic physics has been brought under a single unity that is correct with my Four-Sphere Theory that involved quite extraordinary sacrifices in adversity. Four-Sphere Theory eclipses all the extant theories of Nature, Big Bang and Expansion, Gravity theory, Relativity Theory, and Quantum Theory. I am American, and have loyalty to the security of Natural Rights of all people, and yet, East will judge that West had mistreated an Eastern Aristocratic Genius in a way and they will then distrust Western institutions and seek to develop their own. This is the likely outcome, for I have asked for relatively little of these universities, a couple of doctorates and a full professorship.

I have studied Ralph Waldo Emerson and Friedrich Nietzsche for most of my life, and am currently thinking about Genetic Uniqueness of individuals and their Character. I will eventually make progress. But you should know that I am 48, and I am living not on my own with a reasonable earning but with my aunt who is not always kind to me in Allen Texas, a humiliating existence, and this is known to Harvard, Princeton, Yale, Stanford and Berkeley, the top universities of America.

This is not a threat at all. It is human nature. East was the cradle of Civilisation with Mesopotamia, with Egypt, China, and India, and Four-Sphere Theory was the fruit of my personal work and effort, and not the derivative work of others. This will leave a mark on the Eastern Psyche without a doubt. So all of Western Civilisation will be judged, in a way, on how I am treated in the United States of America.

One of the interesting things about judgments is that they are made regardless of whose responsibility it is to do what.

I am American and I am far more comfortable in the Western Civilisation than the East since I moved to America so young. I am surprised that Harvard and others are not accomodating my request quickly and without concern. Whatever the reasons, this will not be judged well by Eastern peoples, especially Eastern Nobles, as they will consider it a sign of the attitudes that Western elites have regarding worth of Eastern lives, and they will naturally be quite dismayed.

This is most likely what will transpire, but I am going to keep moving. I think I have gone through a circle of topics that will give me some ability to think about Genetic Uniqueness and Personality Type theory for Universal Human Being, and this is worthwhile doing now and will have lasting positive effect on the future of Civilisation.

1. HARVARD WILL BE THROWN OUT INTO OBLIVION IF HARVARD EVEN
CONTEMPLATES RACIAL CAPABILITY FOR SCIENCE ETC.

Harvard is not the corner grocery store. It is the pre-eminent central intellectual center of the American Civilisation. It is one thing for people without any college degree such as Bill Gates to pontificate about how non-white people are not as good at science as whites etc. It is an entirely different matter when the pre-eminent institution of higher education like Harvard takes any of this drivel, this gibberish, this poison, seriously enough to have any of their decisions affected by it. This will literally be like Harvard drinking hemlock and be thrown out of the skies into oblivion. It's not easy to maintain a position of intellectual leadership in a complex world and Harvard is totally suicidal for listening to the most ignorant hillbilly racial nonsense from Bill Gates. You should instead try to bomb him back to Timbuktu and ensure his physical body is totally obliterated so that he can't arise to threaten the human race ever again. How did the Harvard Administrators get their jobs? You seem worse than these high schoolers like Bill Gates in your totally ludicrous racial prejudices.
