

## EXPLANATION OF MY POSITION TO JOHN SUNUNU

ZULFIKAR MOINUDDIN AHMED

Well John Sununu, the open letter previously was not personal; you can substitute your name with any senior *white* person with authority to make Defense decisions.

Now let me explain some aspects of my political positions. I was indeed anti-Iraq war International Socialist in 2003-2005 but do not make inferences from that since I have evolved politically since. These days I returned to my Romantic roots aligned with Universal natural rights that are global and ethnicity-independent. So I will then stand on US Declaration Preamble only which you know, and then show my Permanent Residency of 24 years USCIS# 046-077-179 (been in the country 34 years including high school valedictorian and Princeton) which expires 2031 – so I am American but not actually violating any conflicts of interest as I am *not* a Defense or government official and only worked in industry but I can use universal natural rights adherence and take up a position to represent all Asian nations on issues of global peace and security and prosecute criminal violations of international law by people like Bill Gates and parts of American Government conspiring wars in Asia without provocation. Those are against international law.

### 1. NO NO NO UNITED STATES DOES NOT HAVE SOVEREIGN RIGHT TO PLOT WARS IN ASIA

John Sununu you have a very bad idea of what Sovereign Rights can be allowed. United States has the right to *defend itself in case of aggression* but it does not have any Sovereign right to plot aggressive wars that are unprovoked. Why? Good question. It is because United States is a member of United Nations and United Nations is an *implicit promise* not only not to produce disharmony to international peace and security but as Permanent Member of UN Security Council to ensure that no one else is doing those things. No member of UN has Sovereign right to prepare unprovoked wars. Alright? You can try to *establish such things* one day *after being unceremoniously ejected from the United Nations* which I will arrange if I even hear about this rubbish once more.
