

ON THE INVOLVEMENT OF MANY ENGLISH PEOPLE

ZULFIKAR MOINUDDIN AHMED

A lot of English people found that Bill Gates had used a lot of English meta to harm me and keep his own industrial position higher than mine. Except for several visits to London I never lived in England. When I was married to Natalia Brizuela, we visited London and stayed at a flat my one of the daughters of Homero Aridjis, the Mexican poet; the younger daughter was our classmate at Princeton.

England is unimpressed with Bill Gates now as they have never witnessed as much damage to the eyes of a Bengali man. They will now no longer be impressed by Americans, as they see that Bill Gates is not as cultivated and literary as I am. They are also impressed it seems from the Stanford Mathematics Ph.D. Qualifications questions I was working on in the last few days. Bill Gates has, in his self-promotion propaganda, claimed great abilities in mathematics but these are all lies. When actually challenged to compete with me in solving any mathematical problems from Stanford Spring 2012 Analysis Ph.D. Qualification exams, he found various baloney excuses in order to avoid doing any work.

I don't think many people in England will be enthusiastic about Bill Gates at all any more, especially if I die from the harm he has done to me. He has left so much English meta near me that all English people will eventually know the truth, that he is a racial murderer and accosted an American man of Bengali origin with 24 years of Permanent Residency with far better education and cultivation than himself, and the United States Government did not intervene by killing him.

English people found my Bengali meta, personal meta devastated by Bill Gates. They assure me that in the more than four centuries that England and Bengal had interacted from even before the Mughal Emperor Shah Jahan gave the English traders hospitality in Bengal, no Bengali person has ever been harmed by any Englishman remotely as much as Bill Gates has harmed me. Bill Gates keeps repeating , "I'm white. I'm white" as though the English people ought to understand something in what he means.

The truth is, of course, that Bill Gates has extremely evil, malevolent, racial hatred without cause that is so great from his childhood that he considers harming non-white people to be some sort of normal white preoccupation, while extremely rare is the racial hatred so severe that anyone even invades a non-white man's personal meta at all.
