

INSTRUCTIONS TO ECB FOR CERTAIN TASKS

ZULFIKAR MOINUDDIN AHMED

Madam Lagarde, the President of ECB has been kind enough to gift me \$500 mn for the Global Life Satisfaction project. I have not received these funds yet, and I suspect might not in years. In case this never takes place, I want to give ECB certain important tasks that I had planned to do myself.

(a) Global Romantic Matching. I have developed algorithms for romantic matching that involves both Big Five and Seligman 24 Character Strengths and used my Personality Type scheme which is available in Github. My simulation results showed that marriage and relationship satisfaction can be vastly improved by Zulf's Q metrics. I want ECB to organise efforts, if I should fail, for web-mobile services to introduce approximate Soul Mates to each other. I want with this Document-management for Self-Disclosure with the software for all people who are involved. I am getting quite irritated at the failure rate of romantic matches among my Beloved People the Human Race.

(b) Global Individual Debt problem. I want automated lending to all people of Earth and use some respectable individual credit default rate and I want software to assist people in paying back on time and improving their credit rating.

(c) Quantitative Positive Psychology with Massive Delivery for all people of Earth. I want ECB to take charge of developing this.

(d) Complete Aristotle-Avicenna Virtue theory by determining the Virtues associated to Romantic Love, verify that Life Satisfaction improves. Then implement K-12 curriculum that is globally valid for Virtue Education. The key here is that my results show that Virtue empirically improves Life Satisfaction and therefore one ought to include it in the K-12 education of all children to prepare them for a fulfilling life. The second part of the project is similar to those of Wolfgang Von Goethe and Jean-Jacques Rousseau and others from Romantic Era but today the world needs stronger preparation than provided currently as the world is more complex and children need to be stronger and better prepared.
