

ETHNICITY EFFECTS ON MORAL VIEWS ABOUT VIOLENCE AGAINST OTHERS

ZULFIKAR MOINUDDIN AHMED

1. CHART

Let us take a look at non-violent people by ethnicity.

| | eth | good |
|---|------------|-------|
| 1 | Arab | 98.08 |
| 2 | Black | 94.39 |
| 3 | East Asian | 95.28 |
| 4 | Indian | 97.27 |
| 5 | Other | 92.64 |
| 6 | White | 94.04 |

This is quite interesting because Arabs are the least violent ethnicity here, and whites are more violent than blacks. Both of these are quite far from the racial propaganda that I find propagating in America routinely.

Regardless, the sober assessment here is that roughly 95% of all ethnicities are peaceful people.

Now let us record the ethnicity effect on violence.

| | eth | explained |
|---|------------|-----------|
| 1 | Arab | 0.57 |
| 2 | Black | 2.05 |
| 3 | East Asian | 2.62 |
| 4 | Indian | 0.59 |
| 5 | Other | 1.86 |
| 6 | White | 1.14 |
