

## OPEN LETTER TO US INDUSTRY

ZULFIKAR MOINUDDIN AHMED

Ladies and Gentlemen, and leaders of US Industry. I am Zulfikar Moinuddin Ahmed, and I am American. My background is Finance, with a stint at Lehman Brothers in 1995-1996 as quant, and later as Vice President and head quant around 2005-7 at Gresham Investment Management, behind which was the private wealth and experience of Henry Jarecki of New York. I have had professional Technology positions in New York including working for the entrepreneur Robert Reich around 1997, and as Senior Consultant at Technology Solutions Company. Finally I have led signal processing and pattern recognition as Scientist II at the pharmaceutical biotechnology company Biospect/Predicant in South San Francisco around 2002-5. I want to ensure that I have approval to be Employer for my currently stalled company Thysself Inc. later on.

I want to tell you about the World Order Play I made at the United Nations Security Council. They are recorded in UN Emails and you can read them yourselves since they are public record. In summary, I want Germany, France, and England on one hand and Russia, China, and Japan on the other hand to produce mutual defense pacts. This will ensure a reasonable security umbrella for much of the world. I also proposed that Germany lead a proposal for Natural Rights Security World Order.

In more primitive times, it was advantageous for American Industry to have an American hegemony, and that secured favourable conditions for American Industry. The world has matured, and we cannot rely on Washington to have the judgment necessary to ensure secure conditions for American Industry to thrive around the world. We need uniform laws and uniform enforcement of laws. One way to see my vision for world order is to consider the enormous success of American Industry in nineteenth and twentieth century to be a secondary effect of Natural Rights Security. I believe the same is true for the globe. American Industry will thrive with any world order with the preconditions are met for all people.

I will hope you will review my decisions on world order to evaluate my abilities as a leader as well in US Industry in the future. I am extremely disappointed by Bill Gates in many ways. He seems to think that criminal methods are the only way business works. I hope that US Industry does not have the same view. I hope that we are able to see that with integrity, with virtuous Character, with Benevolence toward our beloved people, the human race that is genuine and not fake, with respect and dignity for all people of all walks of life, we will remain a great and positive presence in the lives of humanity.

I do not say this as a matter of rhetorical ebullience but have examined myself Aristotle's Virtue-Eudaimonia Theory. It is true. We, in American Industry, do not stand for profit for ourselves and misery to others. We do not stand for greed
