

ISSUES OF UNITED STATES GOVERNMENT LIABILITIES FOR FAILURE TO PHYSICALLY KILL BILL GATES

ZULFIKAR MOINUDDIN AHMED

Dear General Schwarzkopf,

I am an Asian-American *immigrant*. Just so that you are clear, I immigrated in 1987 from Bengal, but it was not an immigrant *visa* then. I obtained my *immigrant visa*, i.e. authorisation to make America my home and prepare to live here and naturalise, that I received in 1997, in Buenos Aires, Argentina. I had married Natalia Brizuela, a Princeton classmate, and at the time I had a F-1 for graduate school at Columbia. I was not particularly worried then about immigration issues and did not apply for any immigrant visa before I went with my wife to visit my in-laws in Argentina. My ex-wife started crying when the immigration officers said that they cannot allow me to re-enter America because even though I had a valid F-1, for graduate studies, since I had married an American Citizen, I could not prove to them that I did not intend to live in America and that disqualified my F-1 visa. And I was stuck in Argentina for ages and got my graduate studies at Columbia University derailed fatally in the end because my ex-wife returned to start her classes at NYU but I was stuck there. Anyway after huge amounts of wrangling, I was given a Permanent Residency, immigrant visa. And this is what, quarter of century ago.

I am telling you this because if United States is going to be sticklers on fine points, I will return you the favour right now. I claim that beyond *International Law*, i.e., UN Universal Declaration of Human Rights 1948 whatever is the current version, and beyond the Constitutional mandate, i.e. governments are instituted to secure natural rights in US Independence Declaration Preamble, which are general, my Permanent Residency has been a strongly legal contract between Zulfikar Moinuddin Ahmed and United States of America, the government. The terms of that contract were not negotiable from the side of US Government. They were determined by whatever rancor of democratic politics from nineteenth century to 1997, as the immigration agency then, INS I think it was called then, USCIS today, processed all immigration laws and gave me a contract that I signed. So for me there was no automaticity. There are explicit contracts involved.

I claim that the contract implies explicit obligations towards my person from United States Government which are delivery of security of Right of Life, Liberty and Pursuit of Happiness, including safety of private property. This is implicit and I can guarantee that any top lawyer will agree with my claim. In other words, since I upheld my part of the contract which has a lot of paperwork, and my Permanent Residency # 046-077-179 expires in 2031, that you, the United States Government, are obligated to uphold yours.

Date: November 19, 2021.

This would be routine issue in general but it is not routine because the man determined to deny my Life, Liberty, Pursuit of Happiness, livelihood, private property of \$620 million is Bill Gates. That is why all this is important and not trivial.

I claim that *unless United States Government physically eliminates Bill Gates as a threat to my Life, Liberty and Pursuit of Happiness* that United States Government is in breach of contract with me, and that to ensure that you have sufficient cost, I will demand a penalty of \$1-2 *trillion* from the United States for failure to comply with your obligations. The reasoning is that United States Government cannot be allowed to value this contract without consideration that Bill Gates controls around \$1 trillion in US Govt accounting, and therefore you might be tempted to value my life less than his. I will deny your ability to do that. I will set penalty for cost of defaulting on your obligations to me at \$1-2 trillion.

Moreover you cannot prove that Bill Gates will not be a threat to my Life, Liberty, and Pursuit of Happiness so long as he lives because he is extremely committed to very strange racial rights that he invented for harming my natural rights and denying my \$620 million income (which is private property not promise of investment).

Why should I be less of a stickler for fine points when you gave me obscene amounts of headaches before I was approved for my Permanent Residency. I am serious about all of this.

I have not seen any serious effort to secure my natural rights or American Dream at all because Bill Gates wants to *establish new order of racial hierarchy and is deliberate in his harm to my natural rights and is not doing this by error*. So I have to hold your obligations clearly on paper.
