

BILL GATES IS A TOTAL FUCKING MORON IN SCIENCE

ZULFIKAR MOINUDDIN AHMED

Bill Gates has decided that *power* will determine what is good science and what is not good science. He is such a fucking moron he literally says "Scientific theories are arbitrary". He is not even a mediocre man in science. He is totally incompetent and should not get a "C" but "F" for totally incompetent in Science.

I have never in my life heard more idiotic and stupid principles in my life as these Bill Gates principles.

- People with more power are more capable to judging scientific theories
- Scientific theories are arbitrary

You might be shocked at hearing such idiotic noise and rubbish from Bill Gates until you remember that he is a glib charlatan who never graduated from college at all.

He should be barred from every serious scientific enterprise in the world. He is a total nightmare with ignorant idiotic ideas about science and will harm science in America and the world permanently with his total inability to understand scientific talent and genius. He is the opposite of a scientific genius. He's the anti-Galileo, the barbarian Visigoth conquerer without even a tiny amount of talent in science at all. He should be shot immediately, relentlessly bombed and obliterated before he takes his ethnicity plan for the world and kills off most of the scientific talent on Earth.
