

MY RELIGIOUS DIFFERENCES WITH JEWS, CHRISTIANS AND MUSLIMS

ZULFIKAR MOINUDDIN AHMED

I am fond of Christians, Muslims, and Jews, especially after verifying your moral values. Now you have some mythologies about Angels and Demons. I am familiar with some of them.

You see, I am an Archangel of Heaven. So I can tell you something about what I know about Archangels and Demons. They will not agree in many respects with the mythologies that you believe about Angels and Demons. Your mythologies are interesting to me, but that's not exactly what I know. I obviously will not be able to accept your mythologies because my faith differs from yours.

Now I am incarnate in human body and have had a human life, and I will not be able to demonstrate that what I know is true to your satisfaction most likely. I don't really care all that much. Believe what you like; it's not my purpose to convert you to any other faith than what is comfortable for you.

Your mythological Angels and Demons are for your benefit. If they give you meaning in your spiritual life, good. They are mostly irrelevant for me. I will perish and shuffle off my mortal coil, then I will go through the center of the Sun, then to center of the Milky Way, exit the galaxy and follow ancient paths through the Sea of Fate between Galaxies, and find another world to be born as a baby, with a new life in a new world. I will meet with some other Archangels who will be able to assess my life on Earth among Human Race, evaluate the efforts of Heaven.

Your mythological Angels and Demons may mean something else to you. Those are for your benefit. We do not want to disrupt things for which we will not take responsibility. That is not our way.

1. THERE ARE MILLIONS OF ANGELIC WORLDS

In this universe, among the billions of galaxies there are millions of Angelic Worlds. Archangels there are trillions. So Heaven is not a location, but rather the community of a set of beings with a set of impulses, let us say. There are worlds which have some of the qualities of human mythologies of Heaven, but Archangels especially are almost never living in those worlds. We are usually living in worlds that are not all that Heavenly, like this one.

2. I DO NOT CARRY MEMORY OF MILLIONS OF LIVES

My Core Life is billions of years old and had lived millions of lives in millions of galaxies. But the memory of those lives I do not carry now. The human brain and mind are not able to handle all that, and I have here a human brain and mind.

The difference between Angels and Archangels besides experience and other qualities is that Archangels do not tend to dwell in Angelic Worlds that are Heavenly in

the sense that Christians or Muslims have. We are all over the universe, and have larger scope and interest than Angels.

Maybe in 100,000 years or less Earth will be Heavenly in the way that you imagine. You, the Human Race, are an Angelic Race, and eventually all your Core Life will be Angels. But for now, you are not ready for exit from the Solar System at all. I won't go into a lot of analysis, but it's not good that you allowed a Demon like Bill Gates to gain great wealth and power. Those are not good. You will cause dangers to other Angelic worlds with these sorts of lack of judgment. You know, he could wipe out the whole Human Race. Demons do not belong in Angelic Worlds. Why would you coddle one and allow it to murder human beings? It would be irresponsible of me to let you exit the Solar System at all.
