

NEW IDEA FOR NORMAN SCHWARZKOPF

ZULFIKAR MOINUDDIN AHMED

Fine, Norman Schwarzkopf, here is one idea that could lead to a decision not to wipe out all White Americans. You could do this even without killing Bill Gates.

So what you do is go to Bill Gates' physical location. Then take him outside, and set up a nice sofa or whatever with a nice table and pour him some tea.

Then you get all the people out of his property and tell them to evacuate.

Then you use heavy military firepower to pulverize the house so nothing remains and tape it.

Then you go to Bill Gates and say, "Oh my God, Bill Gates, that's awful. Look at what they've done to your house." Then say, "You know, Bill Gates, why don't you not cut into American people's eyes and destroy their personal meta and blockade their \$620 million earning. It's not your money, Bill Gates. I loved that house. I really did. Awful what happened to it."

1. I WILL EXPLAIN THE PROBLEM

You see, time for warnings to Bill Gates was about a year ago, just after he breached my blood meta. He has committed so much destruction already that he deserves 1000 simultaneous death penalties that are more than cruel and unusual than ever in history. So if you're going to give him a fatherly warning or something, you will find that I don't trigger your warnings for the sort of people who pose any threat to American Whites – I was shot at 11 and don't like guns and am not expert on nuclear or conventional military equipment – and I don't need them. You will continuously find no actual threats by *your* reckoning and then in the end the American White people will be extinct with a lot of warnings on record.

Centuries later, historians will be diligently working on the lost American Whites who once were powerful but no one will know how they vanished. They will find my warnings in the records and try to piece together the puzzle of Extinction of the American White People. They will classify you along with Saber Tooth Tigers and those really funky Dinosaurs and other exotic extinct things. Some will speculate that this time it was a meteor too. Others will consider you a myth like Atlanteans.

And just in case you are wondering, White People did not invent museums and libraries. In Ancient Egypt you had the Library of Alexandria and many people were curious about understanding phenomena too. I hate it when white people think they invented all sorts of things that other people invented. Ever hear of Mesopotamia? I know you tried to destroy all the artifacts from the Iraqi Museums in the war, and that's not impressive. Mesopotamia is the oldest Civilization, and those non-whites invented money and lending, and if they had not invented laws, you would not know what to write down and fool the world while you continue just not understanding or following any of them.
