

## CARL JUNG AND JOSEPH CAMPBELL'S DISCOVERIES IN UNDERSTANDING THE DEPTH OF THE HUMAN SOUL

Within each of us is hidden our undiscovered Soul and Carl Jung and Joseph Campbell had unlocked the understanding from all the world's mythologies of how to *discover* our undiscovered Soul. There is in it a journey to the underworld, a battle with monsters, a return to the Community, dispensing of the fruits. The community today is the Human Race itself, all human beings. That there is an ordeal is not surprising. The Soul is tested in every way in the process. This is not an analogy to something mundane. This is an allegory of the inner experience of all man. Mythologies only recorded this understanding, until there is no enthusiasm for the journey and the mythologies became fictions or simply stories about other beings in other places, not our own soul. The current period is good with some empirical issues, and that's good, but the depths of the Human Soul will remain mysterious for thousands of years, long after empirical knowledge will fail to fulfill our hearts.
