

## MILKSHAKE AND LEMONADE PROTOCOL FOR ALL MILITARY DECISION MAKERS

This is Archangel Zulf. This is Archangel Zulf.

I want a protocol for all senior military decision makers. I want thorough check of their seven subcortical emotional systems, Play, Lust, Rage, Fear, Care, etc. Look at Panksepp's *Affective Neuroscience* for details. For all important military decisions, I want a scan of all of these; get some technology to do this quickly. Then transparently pass to backup immediately giving the primary decision maker either *Milkshake* or *Lemonade* or some juice. Make standing aside habitual even for people who hate it. All military officials: drink your milkshake and step out of command. Do not *whine like a bitch* do you copy?

I don't want errors on this planet. Do this in Europe, Asia and all other continents.

Archangel Zulf out.
