

ZULFIKAR MOINUDDIN AHMED IS INFINITELY MORE VALUABLE TO AMERICA THAN BILL GATES

First of all I have two directions: Global Life Satisfaction and Global Individual Debt. I can do both of them. Global Life Satisfaction can bring in literally several trillion in revenue in a decade or two to the American economy. Nothing Bill Gates has planned will come close to than. Global Individual Debt will not be as profitable but it will be solid.

Bill Gates has nothing to offer more than me to United States. He is illiterate, totally racial, and his tribal dominance dreams of white control of the world is positively harmful for America.

He has what? He has \$0.135 trillion from selling third rate technology products. Global Life Satisfaction is much deeper than third rate technology products. He has abominable habits of killing 'little guys' and does not respect Natural Rights. I am far greater in virtue and my education is infinitely better. I am literal royal blood from 3000 years and he's riffraff.

My dreams are closer to that of Eleanor Roosevelt who presided over the drafting and acceptance by fifty nations of UN Universal Declaration of Human Rights. Bill Gates uses black magic and illicit military meta to cut up people's eyes and flesh. I am a great genius with Four-Sphere Theory and he's a butcher of Auschwitz hiding behind Sesame Street Big Bird propaganda.

Now in a Civilised nation, he would be killed rapidly and this drama would not ensue, but America has severe problems and is corrupt so there are delays.
