

ZULF'S PRIVATE FAITH EXPLANATIONS OF SOULS AND BODIES

ZULFIKAR MOINUDDIN AHMED

This is not Science proper but I try to be very consistent in my views of Faith and my Scientific views which are for public service.

I do believe that there are billions and trillions of disincarnate souls living in $U(t) = S^4(R) - M(t)$ and that the complement of the three dimensional universe is also filled with life, even Conscious life. But I have examined Four-Sphere Theory sufficiently that I do not believe that these Souls can have much influence on the physical universe *without actual birth in a human fetus*. In other words, I do not believe that it is very easy or even possible to have much influence on Earth without a human life. I do believe that I chose my parents with care and all sorts of calculations that I do not remember because I left all the machinery 'body' in $U(t)$ behind when I was born as human. After that it's the same routine, helplessness, hope that the mother will not consume poison and hemlock while you're developing in the womb. Then you're in the power of the parents, so you hope that while you are still developing your brain and are helpless the father will not beat you continuously and abuse you, then there is adolescent trauma, moral character growth. In other words, there is a democracy in action; it does not matter how illustrious a Soul you were for a million years. When you want to have influence on Earth, you have to go through the same same routine like the rest of the human children.

Why would anyone want to do that to themselves? There are reasons. Human Life has beauty in it, honour and challenges. It is not worth less than many lives as many other things.

In this life, my parents' ethnicity was Bengali-Persian. I chose them. In a previous one they were English. I chose them too between 1180-1300. I do not make choices lightly but overall Human Life is not radically different by ethnicity. You see, this effort of Bill Gates to murder me because of ethnic convictions is not an accident. I would have had a much more difficult time without having had an English life. I can see that Bill Gates is no Virtuous English Knight. I know because I was one in another life.
