ARGUES THAT BILL GATES IS GENETICALLY INFERIOR TO
MYSELF**

ZULFIKAR MOINUDDIN AHMED
ZULFIKAR.AHMED@GMAIL.COM

We hold these truths to be self-evident that all men are created equal, that they are endowed by their Creator certain inalienable natural rights, that among them are Life, Liberty and pursuit of Happiness and that governments are instituted among men to secure them. At birth all human beings, including myself and Bill Gates, share G_c , the genetic code in common, that is 99.9% of both our genomes.

In 1955, Bill Gates was therefore, equal in conception to myself in 1973. The difference in our genetic code was around 0.1% and therefore there was a priori identity.

So then how can Bill Gates be *genetically inferior to me*? How can I prove genetic inferiority of Bill Gates given that my genes and his differ by a maximum of 0.1% of our genetic code?

By the way, the human race is obviously a single race by this genetic code in common G_c dominating all our genetic code.

And yet I see how vile and disgusting his virtues are, how dull and stupid his intellect is, and how paltry his achievements in life are compared to my own and I hypothesize some genetic inferiority of his compared to myself.

1. A REMINDER TO MY READERS ABOUT MY OWN VIRTUES

Note that genetic inferiority is clear in an *indirect way* as my Virtues are world class by habituation. I speak clearly what is true and just. I believe in natural rights security for my beloved people the human race. My heart is great and I love my beloved people the human race and wish well-being and health and happiness for all people.

And you see Bill Gates being *greedy and selfish* and talking in public about philanthropy but in private believing in *genocide of non-whites in America*, using black magic to harm people from early teens, and believing in primitive and savage racial domination theories, never being able to even complete a damn bachelor's degree, lying about his SAT score, saying it was 1590 when it was not. My SAT score was 1450 and I never ever thought about lying about it. I am a great immortal genius. I don't give a damn about competing on SAT scores.

2. GENETIC INFERIORITY OF BILL GATES TO ME IS A SUBTLE QUESTION

There is obviously genetic inferiority hidden in the 0.1% difference in genetic code. What is the true answer here? Why is he so genetically inferior. That is the question that is intriguing.

Date: February 24, 2022.

	Rank	Virtue	Class
1	1	Love	(Humanity)
2	2	Creativity	(Wisdom)
3	3	Honesty	(Courage)
4	4	Curiosity	(Wisdom)
5	5	Spirituality	(Transcendence)
6	6	Hope	(Transcendence)
7	7	Bravery	(Courage)
8	8	Humor	(Transcendence)
9	9	Forgiveness	(Temperance)
10	10	Perspective	(Wisdom)
11	11	LoveOfLearning	(Wisdom)
12	12	AppreciationOfBeautyAndExcellence	(Transcendence)
13	13	SocialIntelligence	(Humanity)
14	14	Zest	(Courage)
15	15	Gratitude	(Transcendence)
16	16	Self-Regulation	(Transcendence)
17	17	Fairness	(Justice)
18	18	Perserverence	(Courage)
19	19	Judgment	(Wisdom)
20	20	Leadership	(Justice)
21	21	Kindness	(Humanity)
22	22	Prudence	(Temperance)
23	23	Teamwork	(Justice)
24	24	Humility	(Temperance)

Environmental factors explains why I am an urbane sophisticate intellectual with great taste with work history in New York and San Francisco while he was a hick from podunk frontier of Northwest, a provincial boor and with horrible gaudy tacky taste.

3. ONLY INFERIOR PEOPLE DETERMINE SUPERIORITY/INFERIORITY BY ETHNICITY

Bill Gates is not inferior to me genetically by *ethnicity*. That's idiotic. Let's do a simple IQ consideration. White IQ distribution is $N(\mu = 100, \sigma = 15)$ while Indian-American IQ distribution is $N(\mu = 112, \sigma = 15)$ according to Forbes [1]. The national average of India has lower IQ. But I want to show you what the problem is for inferring that "Indian-Americans are Superior" or what have you.

The problem is that there is that there is that $\sigma = 15$ is large and so the mean difference here $\Delta\mu = 12$ is not large enough to produce any statistical significance at all for the populations. It does not matter that Indian-American (population of 3 million, 1% of Americans) have higher mean IQ. It's not statistically significantly higher any way.

In general only inferior intellect people like Bill Gates will consider superiority in any measurment by ethnicity. These are guaranteed to be wrong. I consider *the propensity to repeat ethnic-centered claims of superiority therefore to be a significant evidence of inferior intellect of the individual*.

I want to make this a very serious deal. Those people who are unable to appreciate the subtle issue of why $\sigma = 15$ with $\Delta\mu = 12$ in this case and other population differences are in this range leads to

$$\frac{\Delta\mu}{\sigma} = 0.8$$

The t-test result shows statistical difference.

```
> X<- rnorm(100,mean=100,sd=15)
> Y<- rnorm(100,mean=112,sd=15)
> t.test(X,Y)
```

Welch Two Sample t-test

```
data: X and Y
t = -6.2256, df = 197.17, p-value = 2.832e-09
alternative hypothesis: true difference in means is not equal to 0
95 percent confidence interval:
 -16.239515 -8.426237
sample estimates:
mean of x mean of y
 97.58952 109.92240
```

But the trouble even here is that $z - N(\mu = -12, \sigma = 15)$ has some mass with $z > 0$.

```
> 1-pnorm(0,mean=-12,sd=15)
[1] 0.2118554
```

This means that there are 20% of one of the populations, in this case white Americans who will exceed the mean of the second. You need to have intelligence enough to appreciate what this implies for the world out there, with real people. And I think it shows inferior intelligence of people who jump to a conclusion that is ethnicity-wide "Indians are superior" from just $\Delta\mu_{IQ} = 12$ in this case. The same holds for other claims of this sort. *Even when t-test tells you statistical significance* you need to appreciate that there are substantial mass that violates the conclusion and superior intelligence would reject blanket ethnic superiority claims.

But inferior intellects, like Bill Gates, are incapable of doing this.
