

# INSTRUCTION TO CHINA NEVER REPRESS SPEECH

ZULFIKAR MOINUDDIN AHMED

China, you developed separately from West. You have a habit of repressing free speech. Never do that. You see, I have lived in America for 34 years and so I have experience with free speech. Free speech is in the end natural, and you should never get involved. I know this very very very well better than the entire political leadership of China.

The reality is that free speech is in the end like this: no one gives a damn China. No one gives a damn and you are making a grave error by repressing free speech and trying to control it. Let people say whatever they want. Let them. Don't try to control it at all. You will fail very badly if you do that. Let people say whatever they want. It's a natural economy of blah blah. You will find that it evens out because no one gives a damn at all for most of it. So you damage yourselves much more when you try to repress or control it. Don't do that. Your population is too large. Let people say what they want always. It does not matter if they say horrible things that hurt your feelings. Let them. Things will work out just fine if you don't get agitated.

I am not your enemy China. I am of Asian birth. Listen to Zulf. Zulf knows this.

## 1. SPECIFIC SUGGESTIONS

Change China's constitutions and make freedom of speech a guaranteed right of all people everywhere.

You see, China, governments are very unwise to repress any speech, good, bad, ugly, unsightly, blasphemous, evil, whatever. Why? Well human beings are linguistic in our intelligence. You are destroying the potential of your people this way. Let them sing, dance, insult, denigrate, praise, make up fabulous accusations, whatever. Let it go. You will never 'mold the population' by repressing their speech. You will just irritate and annoy them and oppress them that way. Let them do whatever speech they feel like. Most of it will be junk and noise. That's not your headache at all. So what if skanky chick from middle of China had outrageous beliefs about how really she is the true empress of the entire Celestial Heavens and all the Communist Party are just imitators? Let her do that. It's her one life you see. You can't repress speech and expect your Civilisation to be harmonious and happy.

## 2. ZULF WILL TEACH YOU CHINA

Zulf is the master, so pay attention China. Study this article from New York Times [1]. You see I know New York Times. They had 19 Muslims on the front page on September 11 2001, and lied to the world brazenly because none of them

*Date:* December 8, 2021.

hijacked anything. This is war propaganda. Your dealings with Freedom of Speech are not sufficiently seasoned.

*Change your Constitution and make Freedom of Speech a guarantee right away.*

Learn. After you do that tell all Chinese government officials to totally *stop* trying to control any free speech. Just do it. That's it. Problem solved. Then make a huge PR campaign in the West that Chinese people's freedom of speech is the *greatest of assets of China* and find all sorts of ways in which Facebook posts bring the police and FBI to people in America as serious flaws of America. Capisce? Play like a pro here China, learn!

### 3. PUT IN MONEY INTO TRANSLATING COLLECTED WORKS OF CHINESE VARIETY OF POLITICAL VIEWS

Put in let me tell you how much. Order of 250 billion into a gigantic survey of Chinese political opinion, add some other features, but then clean it up and collate it and translate it into English in tomes. Don't worry about how much of it is anti-government or dissident. Just say we respect your opinions. Then make really nice glossy books and sell them in the West celebrating political diversity in opinions in China. Begin a program right away after putting Freedom of Speech in your Constitution.

You see, I know anti-Soviet Propaganda and you don't want a repetition of Alexander Solzhenitsyn. Just put money into ensuring all your political diversity is available to American public. Otherwise war propaganda will begin and support for war to 'liberate Chinese' will gain ground here in America. Your language is too far from English to make many things work. You need surveys of political opinions and total release of all censorship and then you need to constantly find faults in American handling of free speech. Do you understand?

### 4. CONSENT OF THE GOVERNED IS NOT AMERICAN

You see, China, people want their one life not to be subject to governments where their voice has no power. You don't need to do it the way America's founders handled it. Here, the consent of the governed is by election of legislators and executive. You can easily just add something similar and then process the people's demands democratically and do something that allows all Chinese to have their voice matter in government directly. This will reduce strife.

The key point is that 'Consent of the governed' is not American. People want to have some sense that their one life is not subject to government beyond their control at all and then it's unpleasant. Don't do that to the Chinese people. Always take people's opinions seriously and give it due power in government.

### 5. SEE AMERICAN GOVERNMENT DOES NOT WORK AS ADVERTISED

I am American, and American Constitutional mandate from US Declaration of Independence Preamble says governments purpose is secure my natural rights. But American Government does not do this. I have freedom of speech to scream and yell. American Government lets a racial murderer destroy my life without enforcing its own laws. So American Government is not good enough. The founders wanted something that would secure natural rights of all Americans. They devised an organisation *hoping* that their creation will ensure natural rights are secured for all Americans. But it is not good enough. I know this and you know this. But

that is because these are very difficult problems. What you need to understand is that these concepts, natural rights, consent of the governed in government, these are very important and *universally good* ideas. You will find that you will fail in the end when you don't take them seriously and address them in whatever way is reasonable. But you cannot ignore them. People have a psychological need to have autonomy, have some sovereignty in national governance and not be subject to arbitrary tyranny. That's the genius of American foundation. America is *missing* things that make it not work right. So America is founded on *some necessary principles* but not *sufficient principles*. You, China, should not be arrogant and dismiss the *necessary things* from America. We in America do not yet know what is *sufficient*. All sorts of nationalist ra ra does not solve this, either in America, in China, or anywhere. Serious deep issues remain open.
