

COMPARISON OF WORLD CLASS NEW YORK AND HICK SEATTLE

ZULFIKAR MOINUDDIN AHMED

European discovery of New York was 1524 and first land claim was in 1609 by the Dutch. When did podunk hick Seattle start? It was settled first in 1851.

In other words, New York had 242 years of culture and history before podunk hick Seattle was even in existence.

No wonder podunk hick Seattle produces these uncultivated illiterate fucks like Bill Gates who is so unbelievably hick that he thinks Hammurabi, the Amorite King of Mesopotamia was white. Even school children in New York know that this is a hick rubbish thing. We're New Yorkers! We know all about Greatness of Civilisation! These podunk hick places way out there in the boondocks always produce these uncultivated boorish hicks without a goddam clue about anything.

We have more Museums in New York than Seattle has books that teach people that Hammurabi was Amorite and the history of Mesopotamia, ok?

It's just amazing that these uncultivated illiterate boorish hick barbarians who would be considered ignorant and brutish by the Ostrogoths felling Rome dare to even imagine that they can cut up a New Yorkers' eyes and get away with it.
