

SEVERAL YEARS AFTER FOUR-SPHERE THEORY STUPID COSMOLOGISTS ARE STILL BAFFLED BY IRRELEVANT ISSUES

ZULFIKAR MOINUDDIN AHMED

I just read in Newsweek that scientists are baffled by all manner of irrelevant rubbish that I personally already resolved in Four-Sphere Theory clearly [1]. I have done this in 2018 but for whatever reasons, Cosmologists of this primitive age simply cannot appreciate clear simple solutions.

My Four-Sphere theory resolved these long ago [2]. I don't understand why people of this age continues to be baffled by all sorts of things when Zulf gave the resolution so many years ago.
