

## AH WOE AND MISERY: WOMEN HAVE SLIGHTLY HIGHER LIFE SATISFACTION THAN MEN ON EARTH

I am not sexist in the classical sense; I certainly do not think that women are inferior to men in various sorts of ways. I think women differ from men and neither women nor men are intrinsically superior. But still I am a man myself, and my pride as a man is wounded now.

Just look at the Life Satisfaction of Men and Women.

	unsatisfied	satisfied
men	0.23	0.77
women	0.22	0.78

Women have roughly 1% more life satisfaction than men. We better go and tell the king that the sky is falling in. Yes, that is from "Hail To The Theif" of Radiohead, a great song.
