

BILL GATES AND DEMENTED DREAMS OF WHITE RULE OF EARTH IS SUICIDE FOR WESTERN CIVILISATION

ZULFIKAR MOINUDDIN AHMED

1. WEST HAS SIGNIFICANT PROBLEMS VERSUS EAST

In West loneliness is going through the roof; people work to exhaustion and have lower life satisfaction. Marriages are falling apart. Social needs of Western people are met at anemic levels. The GDP is fine for now but will not compete with East in a century. America is over-invested in military. West has racial strife destroying America, inequality and social strife.

These are serious problems. If East decided to dominate the West it will succeed eventually because there is weaker social cohesion of the West. Western people's have become fodder for corporate interests.

The strongest of West's advantages, individual rights, have been eliminated step by step since 9/11 and even earlier. American economy is strong but will not compete with a unified Asian economy if this Old Silk Road unity occurs. West is squandering its greatest advantage, diversity and liberty and natural rights by allowing these malevolent racial cunts like Bill Gates a stage to sell their miserable wares.

Bill Gates and people like him are the greatest threats for total decimation of Western Civilisation because they don't actually know the glorious things of West. They have reduced West to primitive tribal elements based on skin colour. Western Civilisation is far deeper than skin colour and tribal politics Bill Gates, and I know this far better than you, because I originate from a far deeper Civilisation than you do. You might have English ethnicity but you don't know English Civilisation even 1/10th as well as I do. I can do a better job preserving Western Civilisation than you can. You are at the same level of Civilisation as the tribes of Old Testament seeking to kill every man woman and child of a neighboring tribe. Western Civilisation is not as simple as you pretend. "White Race" is an abomination to Western Civilisation. It would be laughed out of the courts of Laplace and Legendre. It is so uncultivated that it is not worth a second thought.
