

BILL GATES IS SUCH AN UNBELIEVABLY DUMB MAN IT HURTS

ZULFIKAR MOINUDDIN AHMED

Bill Gates is convinced still that non-white blood contains shit-piss-cockroach serum. Now that is just so stupid. He is 66 and has never done the simple exercise of understanding that refuse and serum from a vastly different species would poison the blood. He sees all sorts of non-whites running marathons, sky-diving, playing tennis, playing basketball, soccer, and he literally thinks that all these people have poisonous substance that would kill any human being *intrinsically in their blood*.

Now let me tell you something dear reader. If I found that shit-piss-cockroach serum combination gives one all manner of lively energy instead of killing them, I would take all that mix it with sugar water and make the name snazzy and sell superhuman drink for \$5 a soda can and make some serious dough.

The reason I don't do that is because I am quite sure that shit-piss-cockroach serum is not the sort of substance that blood of healthy human beings can tolerate.

I don't understand how these really stupid and moronic people are tolerated in America so much.
