

## ROUGH DRAFT OF ADMINISTRATION OF ALL-ASIA DEFENSIVE STRATEGIES

Japan you will take the lead of producing a world class Asian Defense Technology Institute in Tokyo. China you will take the lead on funding this.

I want you to follow the model of entrance and admissions of *Princeton University* in United States for employment to Asian Defense Organisations. Across Asia make public examinations available at reasonable cost to assess talents to serve in a world class organisation. Do not leave any part of Asia at all isolated. In every poor and affluent region of every religion, across from Andalusia to Indonesia, I want availability of examinations administered in a standardized way like AP and SAT exams. Then I want you to set up United Nations like rules for respectful behaviour and tolerance.

Use this same technique for all All-Asia interests. I want all Asian Air Forces and Militaries organised and refactored. India, I want you to end all strife with Pakistan. Kashmir etc. are trivial. I want order in Asia. Now.
