

# **ZULF PROPOSES THE PERMANENT MOVEMENT TO CONTINUOUSLY ABOLISH THE UNITED STATES GOVERNMENT**

ZULFIKAR MOINUDDIN AHMED

The American Founders had introduces the purpose of government in US Declaration of Independence, which is to secure Natural Rights of Americans. They had made the case that governments ought to be abolished under certain conditions.

I have decided that American Government will never actually perfectly secure all Americans' Natural Rights without a constant pressure.

Therefore I want to introduce the Permanent Movement to Constantly Abolish The American Government. We can tune the movement to constantly put pressure that is proportional to the total Natural Rights in the country that is not being secured. I like a continuous model. We want a quantitative political movement where the pressure to Abolish the United States Government increases whenever there is high lack of securing of Natural Rights and decreases when the securing of Natural Rights is better.

This a fine tuned adjustment to the Founder's ideas of legitimate government.

We ought to ask the US Treasury to fund our Movement to Constantly Abolish the entire US Government. This sort of Movement can improve our Multi-Ethnic Classical Liberal Democratic Republic because without pressure we constantly risk the Government being corrupted and not serving its primary purpose, which is not making money and conquering the Middle East or Full Spectrum Domination but to *secure Natural Rights of Americans*.
