

INSTRUCTIONS TO ASIA AND EUROPE

ZULFIKAR MOINUDDIN AHMED

Don't question my authority Europe and Asia. Just do what I tell you.

Asia, especially China, can you immediate praise the United States Justice Department. Tell the whole world that you just *adore* the United States Justice Department and marvel at how wonderful at it and do study it and you *love the American Way of Life* and nothing could be better. Do a good job. Release to BBC and all Western new outlets right away.

Europe I want covert and overt *military protection* including bombings, use of super duper spy planes, and security for United States Justice Department employees. Tell the world that you don't suspect that China is interested in bombing US Justice Department to smithereens and do believe that China does love the American Way of Life.

Do things right away. Don't do it tomorrow. Don't do it when your children leave for college. Do it now.

Europe you are responsible for keeping Mr. Merrick Garland alive and peacefully doing his work. I don't want any 'hijacked airplanes' hitting Department of Justice building. I don't want any 'stray stealth bomber' that happened to have all sorts of Chinese Dragons dropping bombs that everyone will verify are Chinese-made bombs destroying the very nice US Department of Justice buildings.

Date: December 10, 2021.
