

**BENGAL IS AN ASSET TO UNITED STATES MUCH MORE
THAN BILL GATES**

Bill Gates has been lying to the United States since early 1970s. Most of the new ideas and technologies that he had shown were not his at all. In peacetime, he had been extraordinarily destructive starting around six months ago using US War meta against my Body meta and began a campaign in meta power to destroy me. I am an American with life in America since 1987 and Permanent Residency since 1997 now expiring in 2031. Let there be no mistake that I am American.

Date: August 10, 2021.

Bengal is an asset to the United States the moment I recommend the book of poems 'Shonchita' by Kazi Nazrul Islam to Eddie Vedder who is one of our most talented musicians. The music of Eddie Vedder has an organic natural genius that is unique and he has reached sublime musical genius over the decades and I personally chose Kazi Nazrul Islam who I believe belongs with Rainer Maria Rilke and Thomas Stearns Eliot as one of the greatest of Romantic Modern Poets of the world for Eddie Vedder because I believe the artistic synergy between the two will lead to great advance in American Civilisation.

In the past 24 hours Bill Gates has been diligently working to destroy me, and I am American, in peacetime, and United States is rather slow to respond although I am seeing a slow change of attitude. Bill Gates has the temperament not of an American genius but an Ostrogoth barbaric conqueror with absolutely no sense of civilised norms or appropriate behaviour in peacetime. He has advanced through the decades by murder and destruction by meta means while pretending in public propaganda material as a civilised productive genius. I have dealt with the man in meta for almost a year and can firmly vouch for his absolute destructive savagery and lack of any civilised norms, either Western or Eastern. He is simply ignorant of most US and International Law. He believes that white people are superior and has been engaged in a destructive tribal war for white control and rule of the world for most of his life that was not visible. This war has casualties in actual dead people and destroyed lives. He is so deluded that he does not seem to understand that other white people consider there to be no war at the moment. I have been repeatedly seeking justice from the United States government which in this case would be complete support to secure my Natural Rights. Yesterday he applied enormous – I do not know this area but millions of dollars perhaps – worth of pain in my body which paralysed me and restricted my breathing and this is a crime against humanity because he has absolutely no right to have stormed my deep interior at all past my blood meta without being killed for these require violating many death penalty worthy crime.

Now Eddie Vedder is a national treasure and not Bill Gates, and Eddie Vedder is interested in my recommendation of Kazi Nazrul Islam as an interesting poet whose ouvre is great and that are do not have high quality translations to English yet.

Bengal is old, and Vedic India of 1750 BC had slowly produced old Bengali culture by 500 BC, and the literary tradition of Bengal is quite complex and extensive. I only have eighth grade knowledge of Bengali literature and will not comment more. During the Second World War, India and Bengal with it was under British Colonial control and after 1947 Independence Pakistan was carved out of India. My birth country, Bangladesh was only two years old when I was born, in 1973, and I am not particularly keen about "Bangladeshi Nationalism" which seems to me to be quite artificial. Half of Bengal was still part of India. In any case America is my country and not Bangladesh since I spent most of my life here and am unfamiliar with society in Bangladesh.

Bengal in general, a region about twice the size of Bangladesh with half in India, and Bangladesh in particular was never hostile to United States. Even during the Vietnam War, Bangladesh was new and did not take anti-American positions. So I do not understand why Bill Gates would have been applying War meta against me at all.

I will write more later about this but it is my conviction that Bengal is a far more important asset to the United States than Bill Gates.

1. ZULF IS ZULF NOT A REPRESENTATIVE OF BENGAL

I moved to New York at 13 and ever since had a multi-ethnic life in coastal cosmopolitan cities, New York, Boston, San Francisco. There are 290 million Bengali ethnics in the world, and I know very few of them and my friends and lovers have been white, black, european, south american. I dislike being considered a representative of Bengal because I am Zulf, and I am unique and I am American. I do not understand why I should be pegged in your pigeonhole. I am vast and my beloved people are the entire human race. You cannot tell me who my people are. I will never accept *your judgment* on this matter. I have made my decision and your choices are to *either accept* or *accept* my judgment.

You, whoever you might be, can take your little pigeonhole and classification of me and shove it where the sun don't shine. I have said my beloved people are the entire human race. You cannot decide otherwise and expect any acceptance. Once a man has decided who his people are you have no choice but to accept. I am just amazed at how people feel that they can decide who someone's people are and expect any sympathy for their ludicrous schemes. You can take your scheme that puts me in your pigeonhole and shove it where the sun don't shine. Who are you to tell me who my people are? Did I give you permission to do that? No. You must accept that my people are the human race.
