

## MY CURRENT HEALTH ISSUES

ZULFIKAR MOINUDDIN AHMED

I am not hypochondriac at all. As a matter of fact, I always considered my health to be robust even though I smoke cigarettes and my teeth are yellowed as a result. I have been diagnosed with diabetes, but I responded with purchasing Xylitol and that reduced my unexplained weight gain. In months, my weight is coming closer to normal.

I am not in good health now, however, mostly because of Bill Gates power considers, his destruction of my ethnic meta, his use of US War power to damage my Body meta, and then his use of US Industrial power during a Harvard tenure consider to damage my Exoskeleton. These things are easily discovered by anyone with sufficient power.

My health at the moment is sufficiently bad that I have a nontrivial chance of death. If I should perish, I want the world to know very clearly that Bill Gates ought to be clearly identified as my murderer and all efforts to attribute it to suicide, or Covid, or some other causes besides deliberate and cold blooded and obsessive efforts of Bill Gates ought to be shunned as distractions. It will have been Bill Gates and only Bill Gates and no one other than Bill Gates who ought to be condemned as my murderer and put to death with as unusual and cruel a method as possible to endure for human imagination. He deserves more cruel and more unusal punishment than human imagination is capable of producing, but I am satisfied if you keep within bounds of human imagination for justice.
