

## RELUCTANT DEVIATION INTO A POLITICAL MANIFESTO

I had given up my idealistic global agenda quite a few years ago now. But I am forced to explain what is driving my actions today, on November 14 2021. My beloved people is the human race, around 8 billion souls that populate this world. I love my people. And obviously I wish that they ought to flourish. I have great conscience, and am a virtuous gentleman.

You see, unlike earlier periods in my life, when I turned towards liberalism and turned further left towards socialism and then broke away from socialism and reworked my political convictions, and so on, I feel much more comfortable today at 48 at examining my own character first, things closer to my psyche and self and then work outward from there to find principles. This seems counterintuitive to many politically active people but I don't care. I am Zulf. And I did it my way. In other words I will pronounce my manifesto no longer by consensus of vast numbers of people but instead by the principle that it's right because I say so. Some will say, "Well, Zulf, that's your opinion but others may not agree." That's right. It's my opinion that will be my political ideology and if you don't agree I really could not give a damn at all. If you do agree then you are doing well.

Let's go through these and work out my priorities. Top virtue is Love, and that goes with I love my beloved people the human race of eight billion and wish them to flourish. That's good. That dovetails nicely with this: I believe that all men are created equal with Natural Rights of Life, Liberty and Pursuit of Happiness endowed by their Creator. Since I love my beloved people, I want everyone's Natural Rights to be secure. And that is good. That's part of my political philosophy.

What's the next virtue? Creativity. So here is where this virtue will come in. I will look around the world and notice that Natural Rights are not secured for all people of the world. Then I will devise ways to change this by any means necessary. All options are on the table because it's my political manifesto and I can do it any way I want and no one can stop me. As far as my manifesto is concerned, Nations are fine if Natural Rights are secured for all people otherwise I have no problem erasing all Nations from existence without any problem at all. They are *expendible* in my political philosophy. The Nations can whine and cry if they want, but if they dare violate or permit violation of Natural Rights of my beloved people, I will snap my fingers and they will disappear into oblivion just like that, just 'snap snap'.

Then the third virtue, Honesty. So that just means I am honest and I mean it when I say Nations better secure Natural Rights of all my beloved people or I will snap snap my fingers and they will vanish from existence and no one will ever know where they went.

### 1. AMERICAN MILITARY WILL BE OVERWHELMED IN EUROPE AND ASIA FAIRLY EASILY

United States of America does have some strong air force and other military. But I have asked for mutual defense of England, Germany, France, Japan, China,

and Russia. I will just show you some of the war technology available to England [1]. The powers that I list above will be able to produce an organisation with the capability to overwhelm American Military in both Europe and Asia and challenge Washington as well. I am not a military man, so I won't go into details. I will just note that their legitimacy can be based on United Nations Security Council direct negotiations for mutual East-West Defense. If they pool their defense technology knowledge they will be able to counter United States Military quite easily. India will be involved as well. Now Asian economies jointly can provide sufficient funds for advanced military technology and pooled human resources and cooperation will be able to contain a White Racial Order threat that emanates from *Enemies of Liberty of the Human Race* whether this involves all white people of US Executive Branch or only some.
