

# BILL GATES MAYBE YOUR BLOOD HAS COCKROACH SERUM, PISS, AND SHIT IN IT NOT MINE

ZULFIKAR MOINUDDIN AHMED

Bill Gates perhaps your blood has cockroach serum, piss, and shit mixture in it, but mine is quite noble and my lineage is not peasant like yours. I am surprised you are so confused about what's in your blood. Why do you have these things in your blood Bill Gates? You were not raised in a sanitary way?

I am quite amazed what they teach in suburban white households in Seattle.

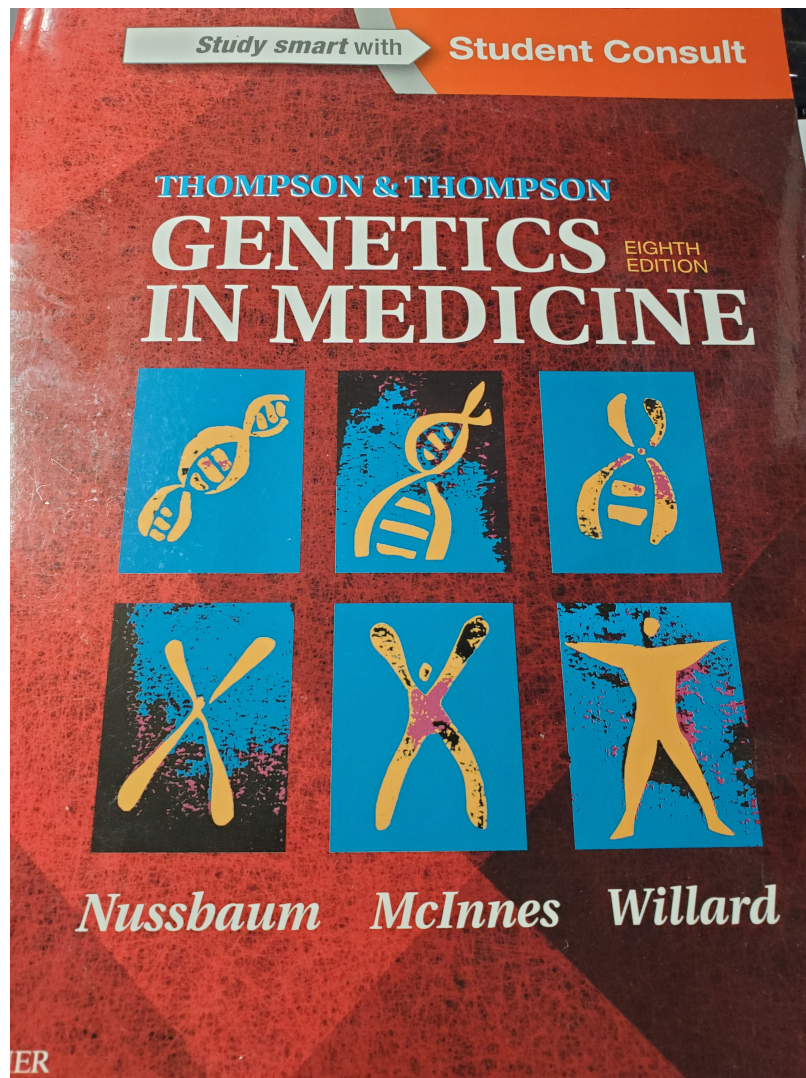

## 1. ZULF'S COMMENTS

It is extremely irrational to believe that another human being has anything in their blood than ordinary elements. The genetic code in common for all human beings,  $G_c$  is around 99.9% of every human being's genome. Now what is cockroach serum? It has nothing to do with human beings and no human being of any ethnicity would survive with blood poisoned by such concoctions. Why? It is because blood is necessary, and human blood contains nutrients needed for the human body to function. And shit and piss? They are refuse of the biological body, purely poison in blood. I am not a total idiot. I don't go around claiming fantastic rubbish about people. I am proud of my stellar scientific education, and no one with any reasonable biological education would think that saying "You have cockroach serum, piss and shit in your blood" is reasonable.

These things *are indeed* disgusting, but you see, when we say a person is disgusting, and I do think Bill Gates is extraordinarily disgusting, what we mean is a disgustingness in *moral character* which is a little different from suggesting quite idiotically that his literal *blood* contains things that are universally quite disgusting to human beings. That, you see, is not possible. What is possible is that a human being has moral character that is repugnant, and our disgust senses are habituated to respond to them *beyond* instinctively disgusting things such as piss, shit, and cockroaches.

## 2. BILL GATES IS SEEN TO BE INFERIOR TO ME

Bill Gates *believes*, fantastically, that I have these elements in my blood: piss, shit, and cockroach serum. This shows that he is inferior in scientific education. Let me show you some thing.

I did not take Biology AP in high school and at Princeton did not take biology but I held a Ph.D. level position in a protein biomarker discovery group in South San Francisco 2002-5 roughly. The book above I have been studying. It's a graduate level book. When I hear someone who believes that all manner of things are in the blood that are incorrect, I immediately consider them illiterate in basic biology. Bill Gates' biological knowledge is less than nothing. He is a liar and charlatan and does not have any medical understanding at all. These make the man inferior to me in *knowledge*.

Second way he is inferior is that he has a demeaning view of other people without knowing much about them. That makes him inferior to him in *moral character*.

I know that these things he tries to implement for 'whites are superior' or whatever agenda has some *tradition* behind it. Black people were denigrated by some of these things in America from the nineteenth century. But in fact, most white people are capable of reasoning and rational thought to enlighten themselves out

BILL GATES MAYBE YOUR BLOOD HAS COCKROACH SERUM, PISS, AND SHIT IN IT NOT MINE

of it. Bill Gates had the opportunity to do so but he did not take them seriously. He is inferior in being a pathetic sad cat who, after his wife leaves him, is involved in very low hateful drivel.

### 3. BLOOD

Homo Sapiens, human beings, have blood that is made from various substances that are determined by the exact genetic code. I have heard of notions of 'pure blood' and so on. But these are all fallacy and soggy unscientific ideas. In reality human race is a single race and around 75,000 years all human race were concentrated in Africa. The global human population arose from diffusion from an East African meta tribe. People who believe that there is a significant difference in blood between people have the burden of explaining how 0.1% genetic variation will suddenly introduce all manner of poisonous substances in one man's blood and all manner of fragrant substances in another's. Bill Gates is a primitive *racist*. He is primitive because these ideas belong from some tribal past of human beings, are mythologies of hatred. They are ignorant nonsense. He believes that white people are superior to non-white people but cannot explain in what way. He believes these things irrationally. But he is malevolent and harms people based on his beliefs. Therefore American Government and Harvard and all institutions of America who do not wish him destroyed are directly threatening vast populations. He means them harm. American Government does not have a right to keep him alive.
