

## THE GALAXIES DO KNOW ZULF QUITE WELL

ZULFIKAR MOINUDDIN AHMED

I am Zulf. I am well known to the galaxies, at least some thousands. They will be a bit surprised at my rage and fury and my need in the end to totally extinct this "Bill Gates" who is an insolent Demon who harmed my interior while I was having a peaceful human life. I obviously will not have much choice but to extinct the little abominable lowlife and turn every molecule of his body into ionised cosmic gas at some point.

You see, the galaxies know me for millions of years. I am not exactly known for my rage and fury. That's not the sort of being I am usually. But this Demon provoked my wrath and rage and fury, and I will wish to ensure that he is erased from existence.

Galaxies are galaxies, and will surely recover from the surprise. They are generally quite polite and kind to me. And in the end, another Demon will have been extincted from another Angelic World. These events are common in the Universe.
