

OPEN LETTER TO LAKESIDE PREP SCHOOL

ZULFIKAR MOINUDDIN AHMED

Dear Lakeside Prep School,

My name is Zulfikar Moinuddin Ahmed. I am in mortal and irreconcilable conflict with an ex-student of yours, Bill Gates.

I will warn Lakeside Prep School that I am not your enemy, and I do not want to be. However I am certain that Bill Gates is a charlatan and your reputation will be damaged irreparably if you do not take measures to protect it.

I recommend that you extract extremely accurate assessment of Bill Gates as a student between 1968-1972 at your institution without any attempt to make him look good, and make it public.

I am not impressed with the intellectual caliber, the achievements, the character, the knowledge of Bill Gates at all and I will totally destroy his reputation which I believe is dangerous for US Technology industry, American people, and the Human Race generally.

My high school years were 1987-1991 and I attended John Adams High School in New York, and I had a world class education with four years at Princeton 1991-1995 on full financial aid with total of \$6,000 in tuition.

My conflict with Bill Gates spans all aspects of life, universe, and everything and will be fought across the globe.

Be prepared, and do what you need to do to sustain your reputation. Bill Gates began his student years in 1968, the same year as My Lai Massacre where William Calley and his troops raped and slaughtered 500 people and burned down a village. And yet Bill Gates still believes that we, United States of America won the Vietnam War.

I immigrated from Bengal in 1987, and have been a Permanent Resident since 1997. I was the valedictorian of John Adams High School in 1991, and have many 5s in my AP exams, in Calculus C, Physics BC, and 4s in English and excellent broad education. My SAT was 1450 on the second attempt and 1170 the first. I took no prep courses. Furthermore, Bill Gates I am sure lied about his SAT – which you will find was 1290 and not 1590.

Be prepared for this.

Sincerely,

Zulfikar Moinuddin Ahmed

Princeton University, magna cum laude 1995

1. FINE LAKESIDE FACULTY I WILL TELL YOU ABOUT MY PRINCETON EXPERIENCE

I was one of very best students that John Adams High School ever had. I was not great at the debate team. Dr. Zimmerman, who led the training of our debate team if I remember 1987-1988 correctly, after a loss to another high school told me

Date: December 19, 2021.

sternly, "Zulf, you have to say what you mean and mean what you say!". I was embarrassed but took him seriously.

At Princeton, I was both excited about being a serious scholar, and also overwhelmed. All the topics and classes were interesting, but I naturally gravitated towards Mathematics and Literature. I was chosen by Lys K. Waltien for scientific talent, and won a third place Westinghouse Science Talent Search prize, where David Ben-Zvi won the first place. He was at Princeton. I loved him. I used to call him fuzz-ball because of his slightly Afro bright red hairdo. He's Israeli-American, but I was not involved in associating my friends with Middle Eastern politics which was far from my mind, and I have no Arab blood in me at all. I am Bengali-Persian which by and large was involved in other issues, British Raj, Hindu-Muslim communal strife, and could not get all that involved in Israel-Palestine issues anyway.

I was much more serious about Literature than I ought to have been in a way. All the Mathematics courses tested my limits. But I got a world class education in Mathematics, so good that even more than two decades from that time, I have good abilities to take Stanford Mathematics Ph.D. qualifications problems in Analysis and make good progress.

Bill Gates got his last chance at education at your institution, Lakeside Prep. After that he became a yaketty-yakker, people who talk about all sorts of abilities and genius for which there is no evidence. He made some money so people don't beat the living bejeezus out of him and throw him into the river. You might think that's a good thing, more civilised. But it's not. In India, they would do that. And that's the right thing to do to these types of goons.

2. ZULF SHOWS HOW EASILY I CAN SWITCH TO A LILTING BENGALI STYLE OF COMMUNICATION

You see, Bengal is a very old Civilisation, from Vedic India of 1750 BC, and Bengal inherited its culture from earliest Vedic epic which are around as old as Iliad and Odyssey in Hellenistic Greece, and long before England became literate after Roman Conquest around 0 AD. So I can outrhetoric a podunk kiddo who played hookey with electronics in Seattle between 1968 and 1972 and did not study anything at all quite easily. And as the actual good students at Lakeside Prep who are more serious in their study of history of Civilisation might know quite well, an illiterate man who does not know much about Civilisation, despite talents at large scale deception, will fare quite poorly against an aristocratic lineage Bengali man who immigrated to America, is a Princetonian and is quite profoundly filled with great love and benevolence for his beloved people, the human race.

What can a man such as Bill Gates who considers Edgar Allen Poe to be a greater poet than Rainer Maria Rilke, who is convinced that Egypt came before Mesopotamia, or even more astoundingly that King Hammurabi of Mesopotamia was a *white man* do against me?

3. TO WHAT EXTENT IS IT LAKESIDE PREP'S LIABILITY?

The most elementary refutation of Bill Gates' conviction that Hammurabi was white is by historical development. Hammurabi was king in Mesopotamia 1810-1750 BC. The earliest Civilisation of Europeans was the Myceneans, 1750-1050 BC. And Ancient Greeks were not 'white' in Bill Gates ways exactly. The likelihood that

white people with less developed civilisations managed to become the king of an Amorite people is almost zero.

Bill Gates says he does not accept the orthodox theory, but he does not have even a college degree from Harvard and not even a single class in anthropology or history. The question is, did Lakeside Prep School not ingrain in the boy any respect for rationality at all?

4. MEIN KAMPF FOR SUPERIORITY OVER BILL GATES

I love the title of this section, *Mein Kampf* for my personal superiority over Bill Gates. You see, Lakeside Prep, *my struggle* for superiority over Bill Gates is quite broad. I realised long ago even when I was a child, that one cannot be weighed down by others one does not control at all when competing for something. Now if Bill Gates is foolish and wants to be superior as an element of a *group*, whether that group be five people or five hundred million, he is making a foolish error. The insight comes from watching cats for some time. Yes, I love cats, and I spent many hours watching cats. The idea of getting large numbers of cats to do anything you want them to do is an impossible endeavour. But alas, Bill Gates does not have keen insights of cat psychology, and he relies on old propaganda of Leni Riefenstahl, forgetting that despite the effort that propagandists in Germany put in, Germany was devastated in war a decade before his birth.

Mein Kampf for superiority over Bill Gates, instead relies on my own *Virtues*, something Bill Gates will have struggle to understand. *Virtues*, which were known to Egyptians and Asians too before Aristotle even articulated *Nicomachean Ethics*. How will the boy compete weighed down by a large mass of people with 18 million below IQ 80 with Zulf? It's hardly likely he can win.

5. WELL GERMANS AND MANY OTHERS MADE ERRORS

You see, Germany, in the long history of the Human Race, various loyalty to groups that are not the entire human race are all short term fads. In the $t \rightarrow \infty$ limit every Angelic Race in the universe will find their loyalty grow larger to the entire race. You have developed a distinct culture you are proud of. That's good. But you did not discover the Universal Human Moral Human Nature, and I did. My results are quite strong, that human *moral nature* does not vary substantially between Germans and anyone else on Earth. It was your foolish propensity to want to consider your distinctness special, and sought differences with other people with just a little bit too much zeal that allowed Zulf to supercede Immanuel Kant and Friedrich Nietzsche on understanding the Human Moral Nature. That's just life, Germany. Every error has its costs.
