

ZULF'S STRATEGY FOR PROVING THAT BILL GATES LIES OUTSIDE HUMAN RANGE IN HIS VIOLENCE

ZULFIKAR MOINUDDIN AHMED

When we fit an exponential model for agreement with "Violence against other people are justified" we get such a beautiful fit for American data with $p < 0.0002$ that we can take it as the true distribution. We find $\lambda_{America} = 0.4537$.

1. AT WHAT POINT DOES BILL GATES EXCEED HUMAN BOUNDS?

This is a general question and we can approach the question rationally.

First, since we are dealing with the exponential distribution, the true range is $[0, \infty)$ and not $[0, 10]$.

Bill Gates falls somewhere $x_{BG} \in [0, \infty)$. Let us try to understand at what point some $x > 0$ goes *beyond Human Bounds*.

For this recall that there are $N = 200 \times 10^6$ white people in America.

We see first that

$$e^{-\lambda_{America}10} = 0.0107.$$

These are people who answered "violence against others is always justified". Now 1.07% of American whites compose a good number of people. So the general idea that violence against other people is always justified, while not palatable for quite a number (roughly 95% have $x < 5$) of white Americans is palatable for some 1.07%.

Now Bill Gates, I know this personally, believes that he ought to have the right and power to kill any nonwhite in America *at will*. This implies that he is in the $x \geq 10$ group of 1.07% white Americans. But it is much more severe. His x_{BG} ought to be much higher than $x = 10$.

The question is whether it is high enough to exceed human bounds.

2. CRITERION FOR EXCEEDING HUMAN BOUNDS

A simple criterion for exceeding human bounds is when

$$e^{-\lambda_{America}x_e} N < 1.0$$

In other words, when the fraction of the population that is higher than x_e is such that there are no whole number of people left in America then x_e is beyond human bounds.

The cutoff value can be estimated as

$$x_e = 42.15$$

This is the cutoff point such that

$$Ne^{-\lambda_{America}x_e} < 1.0$$

with $N = 200,000,000$.

Date: May 6, 2021.

3. EXACT CRITERION FOR BILL GATES EXCEEDING HUMAN BOUNDS

Bill Gates can be said to have *exceeded human bounds* if we are able to establish that $x_{BG} > 42.15$. Since at this point, he is more rare in his agreement of violence against others that exceeds the rarity of 1 in 200 million.

4. BILL GATES IS A DEMON IF $x_{BG} > 42.15$

The moment his propensity towards violence satisfies $x_{BG} > 42.15$ we can safely conclude he is not a Human Soul but a Demon regardless of his Human DNA!
