

## ASIA TAKES CREDIT FOR CRUCIAL INNOVATION FOR NATURAL RIGHTS WORLD ORDER

ZULFIKAR MOINUDDIN AHMED

My checkmate of the American World Order had some potential until Asia determined some even funkier maneuvers. I will tell you about their ideas that I did not think about at all, and will not take credit for.

They figured out the crucial *Human Rights* based *Economic Sanctions* in the United Nations that are *Veto Proof*. Now that's truly a genius move by Asia, and I give them great credit for this particular innovation. Zulf is quite impressed. This is just enough to cascade the American World Order and force the American Government into an Eurasian-Natural Rights World Order.

It's essentially Zulf's World Order with various European and Asian elements in it. Perhaps you could call this world order Zulf's World Order with Shakespearean and Confucian Elements or just Natural Rights World Order.

Anyway, the key is that United Nations General Assembly can repeatedly put economic sanctions based on Human Rights issues, first with Bill Gates racial murder actions against myself, then the blame falls on American Government White People.

This then allows more sanctions based on American War planning. Drone use then leads to more economic sanctions by Human Rights Council while the UN American Representative has a pained frustrated expression. And then Article 34 is violated by the NSC-68 structures in American Government and UN Human Rights Council provides even more sanctions. Then UN Human Rights Council scours through America with a magnifying glass for any natural rights violations in the country not just race-based. More sanctions.

The end product is Zulf's Natural Rights World Order by repeated economic sanctions. The more American Government Whites move, the more deeply America becomes entangled in sanctions.

Beautiful. Beautiful play, and I congratulate Asia for this play. I never get envious and resentful about a great innovation.

### 1. ADVICE TO EURASIA

So this is a geopolitical play where Human Rights Council will drive against War Powers of America and also others. You want some new provisions for security of Human Rights Investigators. You see the sorts of people in America who are planning wars don't give a damn about anything. They will sabotage all the buildings of all Human Rights professionals in all countries with Stealth Bombers in a split second if they thought they could blame Pink Flying Elephants from the outer rim of the Galaxy NX-547251. So give them protection and snuff out all of War Planning in America with Human Rights Council and Economic Sanctions.

*Date:* December 12, 2021.

For example. "The Human Rights Council does not like this sort of shape on your super duper expensive jet planes. It will violate Human Rights of various babies born in the jungles of Borneo and give them traumatic childhood that may or may not manifest in reduced satisfaction in their romantic love life later. We'll Economic Sanction you \$120 billion for this." Like that. Don't worry about what they think.
