

HOPE:HAVING POSITIVE EXPECTATIONS OF THINGS WITH REASONABLE LIKELIHOOD

ZULFIKAR MOINUDDIN AHMED

There are two great projects that I believe I can accomplish with my life. Global Individual Debt and Global Life Satisfaction problems. These are problems that will affect all eight billion people and they are things that are possible today but was not possible in the past. They require some computational technology and some knowledge that was not available in the past. I believe that I was born to accomplish these great tasks for my Beloved People the Human Race.

In order to do these tasks, I do need some significant funding. I am owed \$120 million from D. E. Shaw & Co. which I have not received yet because US Government is not able to provide D. E. Shaw protection from Bill Gates if they give me my money. I am also enthusiastic about MIT Sloan giving me \$500 million. Bill Gates is blockading my personal bank account for reasons of racial hatred. Since Joe Biden is against racial supremacists taking over the country one can hope that Bill Gates will be held criminally accountable for his horrible crimes against my interests and in the end this money will come to my bank account and I will be able to accomplish my great tasks.

This is the essence of my hope for the future. My earnings have been starved by Bill Gates who broke every possible US law and business custom and applied his powers to starve me of all money. I will have to hold United States Government, whose job it was to secure my Natural Rights, for the existence of this criminal malevolent operator who has made my life a living nightmare for the past year and who deserves to be beat to a pulp, flogged fifty times and killed by cruel and unusual punishments. No more horrid cunt has ever existed among the human race as Bill Gates.
