

MY INTELLIGENCE AND INTELLECT IS FAR HIGHER THAN  
BILL GATES DECEMBER 3 2021

ZULFIKAR MOINUDDIN AHMED

Bill Gates is not a college graduate. He is not intellectually very good. He did get an SAT score of 1290. That's a reasonable score. On my first SAT test in high school I scored 1170, and that was lower than his. But on my second attempt I scored 1450 which is higher. He tells people it was 1590 which is false. He lied. My IQ is 135-140, around 99th Percentile of White IQ distribution, which is  $N(\mu = 100, \sigma = 15)$ . His is definitely not much better than mine. He tells people he had IQ of 160. That's false. He does not have an IQ of 160.

You see, Bill Gates has found some way of duping people into believing that he is exceptionally intelligent. He is not. He had some potential when he was younger, but he dropped out of college after a year and so he is underdeveloped intellectually. He's not even in the same league in intellect as I am. In fact he is not even in the same league as *any* college graduate in America, around 30 percent of the population. He is a *charlatan*. He does not read most of the books that he puts in his documentaries. That is his sales gimmick, and it is hollow. He's not very good.
