

ZULF MAKES WHITE ELECTRICIANS SERVING OUR ELECTRICITY NEEDS A NATIONAL ISSUE

ZULFIKAR MOINUDDIN AHMED

1. JUNE 16 2021: TWO WHITE ELECTRICIANS SERVED OUR ELECTRICITY NEEDS

This is not a big deal in America at all. We are of Indian background and we're American. Two white electricians came by and we worked out wiring and other issues of electricity coming into the house. They did their work and I minded my business and they got paid and we ended up having electricity later when OnCor put the meter back on. The cost was a bit steep but electricity was working by the evening and I went on to write some notes for MIT, Stanford and Harvard Biology because I am now interested in origins of life.

2. WHY IS THIS A NATIONAL ISSUE?

Bill Gates, the tribal racial white supremacist, had declared to various people that white people are apparently denigrating themselves when they serve non-whites. The suggestion is frankly absurd. In the Covid-19 economy many people, white and otherwise, are looking for some income, and they are doing their professional work. Bill Gates' early Medieval Age attitude based on racial supremacy works for him because he's glib and he has \$130.5 billion while others, both white and otherwise actually have to take life seriously and earn their living by their professional competence. Obviously there is no denigration in doing one's work, whether the service is to whites or not. I don't think Bill Gates will compensate any white people who forego doing a good gig for any loss in income. White people ought to shun him completely for he does not actually care about you. He cares about his own agenda for global power and he's using you as pawns.
