

OPEN LETTER TO HELEN FISHER

Dear Dr. Fisher,

First of all, you *have* to drop your prejudices against Muslim men. They are embarrassing. You are a Jewish high falutin American liberal, and you have never even had a fling with any Muslim men. I will bet that is true. Why? It is because only 1.1% of Americans are Muslim, and so the probability that you will even come into social contact with any Muslim men is low, and they live far away from you. I do respect your genius about anthropology, biology, and neuroscience of love but you're too ignorant about Muslims. Muslim women have higher life satisfaction than Western Judeo-Christian women. I have numbers from World Values Survey for that. I will tell you why. Muslim men treat women just fine. That's why. I have observed my uncle and father deal with my mom and aunt for all my life and they have more patience with women than I will ever have.

Next, I am not Muslim at all. Don't get confused about this. My values are more European than American even and all my past lovers are Western. And I don't remember any of them calling their friends crying about how I was mistreating them. In fact they all have good memories of our time together.

With that out of the way, let's talk seriously. So what is your expert opinion of me and Julia? I like her. I am assisting her because I am a gentleman who is 49 and she is 26 and regardless of what transpires, I do have an obligation to do a bit to assist her towards a better life.
