

## ZULF CONSIDERS AN ALTERNATIVE PLAN

ZULFIKAR MOINUDDIN AHMED

Now I will consider whether American Government is adamant that Indian-ethnic American immigrants like me should be denied their \$620 million legitimately earned and denied their American Dream even if they live in America without violating laws and being Princetonians with decades of experience in industry and be given to predators and beasts like Bill Gates and not have *even* their natural rights secured.

I could just fold shop and return to India, and there I will have opportunity to do my projects, warning Indians and Asians not to trust the American Dream or work in America for they will not allow you to succeed and deny your natural rights when predators like Bill Gates breach your blood meta, and destroy your personal life and career, they will side with the racial murderers.

That's definitely feasible still, and there are many people in Asia who are doing interesting things. I am used to America, however, but I should be willing to do this as well. I am not sure about this yet, but it's a serious option. I had always thought of my life as belonging in San Francisco. Perhaps that is wrong. Perhaps America is the white supremacist stronghold and does not allow non-white people to succeed in the American Dream after all.

The jury on this is still not clear. But it is quite disturbing to me that American Government allowed Bill Gates to do so much harm frivolously without holding him accountable. I expect much better treatment in Asia.
